Education And The Rise Of The Global Economy:

Education and the Rise of the Global Economy Joel Spring, 1998-09-01 Joel Spring investigates the role of educational policy in the evolving global economy and the consequences of school systems around the world adapting to meet the needs of international corporations. The new global model for education addresses problems of technological change, the quick exchange of capital and free markets policies to resolve these problems include lifelong learning, learning societies, international and national accreditation of work skills, international and national standards and tests, school choice, multiculturalism and economic nationalism. The distinctive contribution Spring makes is to offer an original interpretive framework for examining and understanding the interconnections among education, imperialism and colonialism and the rise of the global economy. He offers a unique comparison of the educational policies of the World Bank, the United Nations, the European Union and the Organization for Economic Development and Cooperation. Additionally, he provides and weaves together important historical and current information on education in the context of the expansion of international capitalism. Much of this information gathered from many diverse sources is otherwise not easily available to readers of this book. In the concluding chapters of the volume, Spring presents a thoughtful analysis and a powerful argument emphasizing the importance of human rights education in a global economy. This volume is a sequel to Spring's earlier book *Education and the Rise of the Corporate State* 1972, continuing the work he has been engaged in since the 1970s to describe and analyze the relationship between political, economic and historical forces and educational policy.

Education and the Rise of the Global Economy Joel H. Spring, 1998. Discussing the relationship between the development of the global economy, educational policy, this text covers topics such as European colonialism, the Japanese response to colonialism, the World Bank and the United Nations.

Education, Training and the Global Economy D. N. Ashton, Francis Green, 1996. A response to the popular political education and training myth which permeates current discussions for solving economic problems. Ashton, sociology, U of Leicester and Green, economics, U of Leeds, survey empirical data, examine theoretical approaches to education and training and take a close look at current skills trends in the global economy, determining the institutional and historical determinants to low or high skill occupations. They conclude with an examination of public policy in industrial countries and its profound influence on education and training. Annotation copyright by Book News Inc, Portland, OR.

Education in a Digital World Neil Selwyn, 2013. Drawing on a wealth of theoretical and empirical work, *Education in a Digital World* tackles a number of pressing questions such as how are global trends in educational technology refracted?

through national policies and processes How exactly are educational technologies linked to issues of global economics and the fortunes of national and international economies To what extent are digital technologies implicated in the commercialisation marketization and commodification of education These questions and others are addressed throughout eight wide ranging chapters which consider topics such as the national policy strategies of countries across North and South America Europe and East Asia the educational technology portfolios of international organizations such as the United Nations and Microsoft as well as the role of education and technology in international development and the on going efforts to provide one laptop per child across low income regions and countries Through these examples Selwyn develops a detailed analysis of education technology and globalisation drawing together arguments and debates from various academic perspectives Written in a detailed but accessible manner this is an essential book for anyone wishing to gain a better understanding of the role of education and technology in contemporary globalised society

The Future of Protestant Religious Education in an Age of Globalization Hyun-Sook Kim, Richard R. Osmer, Friedrich Schweitzer, 2018 Global developments have come to shape our lives economically culturally and even religiously Young people growing up in a global age have to be prepared for living in this age Economic and technological demands are important but there also is a need for personal and social orientations that go beyond them This book provides both insights into the Protestant tradition in education as well as its meaning for the future of the church for society and for individual persons It follows an innovative approach by combining perspectives from three different contexts Germany with its important Protestant starting points in the Reformation the United States as a country which has been strongly influenced by Protestantism and South Korea with its comparatively young Protestant tradition The book is based on a combination of international points of view on transnational cooperation on comparative insights and on making constant reference to a global horizon Its presentations and ideas not only address globalization as a driving force behind many future developments but also demonstrate an exercise of global educational thinking Hyun Sook Kim is professor of Christian Education at the College of Theology Yonsei University Korea

Knowledge and Prosperity: Navigating the Future of Work and Education Pasquale De Marco, 2025-08-15 In the rapidly evolving landscape of the 21st century the emergence of the knowledge economy has fundamentally transformed the way we work learn and live This book explores the profound implications of this new economic paradigm delving into the challenges and opportunities it presents for individuals organizations and society as a whole The knowledge economy is characterized by the increasing importance of knowledge and information as the primary factors of production rather than traditional resources like land labor and capital This has led to a growing demand for highly skilled workers and a corresponding decline in the demand for unskilled labor The rise of the knowledge economy has also had a significant impact on education In the past education was primarily focused on preparing students for specific occupations However in today s rapidly changing world it is more important than ever to develop skills that are adaptable

and transferable This book provides a comprehensive examination of the knowledge economy covering a wide range of topics including The changing nature of work and employment The skills and competencies needed for the knowledge economy The role of education and lifelong learning The impact of the knowledge economy on inequality and social mobility The challenges and opportunities of the knowledge economy for businesses and organizations The future of work and the implications for society Drawing on cutting edge research and real world examples this book offers a thought provoking analysis of the knowledge economy and its implications for the future of work education and society It is essential reading for anyone seeking to understand and navigate the complexities of the modern economy If you like this book write a review

Globalization and the Rise of Mass Education David Mitch, Gabriele Cappelli, 2019-10-24 This edited collection explores the historical determinants of the rise of mass schooling and human capital accumulation based on a global long run perspective focusing on a variety of countries in Europe the Middle East Asia Africa and the Americas The authors analyze the increasing importance attached to globalization as a factor in how social institutional and economic change shapes national and regional educational trends Although recent research in economic history has increasingly devoted more attention to global forces in shaping the institutions and fortunes of different world regions the link and contrast between national education policies and the forces of globalization remains largely under researched within the field The globalization of the world economy starting in the nineteenth century brought about important changes that affected school policy itself as well as the process of long term human capital accumulation Large migrations prompted brain drain and gain across countries alongside rapid transformations in the sectoral composition of the economy and demand for skills Ideas on education and schooling circulated more easily bringing about relevant changes in public policy while the changing political voice of winners and losers from globalization determined the path followed by public choice Similarly religion and the spread of missions came to play a crucial role for the rise of schooling globally **Education and the Nation State** S.
