## **Education Employment:**

**101 Careers in Education** John Carlson, Richard Carlson, 2015-09-16 Education is a rewarding area of work that provides some of the most diverse career opportunities of any field. Written by educators with real world knowledge of the profession, this information-packed guide provides the career explorer with concise information on the necessary skills, training, certification, licensure, compensation, and employment outlook for over 100 careers in a wide range of education settings. This book describes careers that range from working with very young children to positions in traditional K-12 schools to educating adults in organizational settings. It discusses careers suitable for those who enjoy working with people as well as careers for individuals who are more comfortable with information or ideas. A particularly useful feature is information about alternative paths to working in education for those with degrees in related service professions. Careers outside of traditional settings include work in adult education, independent education business, or government settings; community-based educational services; and part-time opportunities to name a few. Special attention is paid to positions in STEM and educational technology, one of education's fastest growing careers, and careers of leadership including management, innovation, and accountability. The authors also provide a guide to self-assessment that helps readers to learn about those careers that best match their interests and temperament. Interviews with education professionals in a variety of arenas such as middle school foreign language teacher, special education teacher, Head Start coordinator, and college athletic director offer an in-depth look at different career opportunities. **Key Features:** Covers 101 careers including necessary skills, training, certification, licensure, compensation, and employment outlook. Includes career options for new teachers, those changing careers within education, and those seeking education as a second career. Includes many career options outside of traditional school settings. Presents interviews with 23 individuals in different educational positions. Provides self-assessment questions, information pertaining to professional development, and guidance on the job search process. *Education, Employment, and Negro Equality* Otto Eckstein, 1968 Conference report on a meeting to study problems related to employment policy in respect of equal employment opportunities for Blacks in the USA includes a record of discussions on a statement covering discrimination aspects of the occupational structure, input/output aspects of relevant issues in educational planning, etc. Conference held in Washington, 1968, April 18. **Health, Education, Employment, and Income Security Reports**, 1994. *Young People Not in Education, Employment Or Training* Great Britain. **Career Development as a Partner in Nation Building Australia** Wendy Patton,2019-07-15 Despite examples of vocational guidance practice being evident in Australia since the mid 1800s there remains a spasmodic and patchwork approach to practice across the country For decades it is a field which has been paradoxically boosted and challenged by changing economic and political agendas Repeated international national and State reviews emphasise the vital nature of a systemic national approach to career development however authors repeatedly lament the lack of a sustained focus on career activity as a major national priority There is no broad comprehensive historical reckoning of the history of career development theory and practice in Australia since this early period Career development theory and practice in Australia has been forged in partnership with developments in an international context In documenting the shared history with other countries the author significantly adds to the body of knowledge on career development as a field in Australia and internationally The book provides new understandings about the historical development of this field of knowledge and in particular the challenging and cyclical nature of its policy history
