Kay Johnston,Heidi A. Ross,2015-12-03 Taking Teaching Seriously expands and enriches discussions about teacher preparation in the United States Its authors describe the unique contexts for teacher preparation offered by liberal arts institutions and analyze the effects of these programs on their graduates and on K12 schools They emphasize that the goals and conditions for teacher preparation differ from larger public institutions in several key respects including supervisor student teacher relationships philosophical foundations and approaches to clinical fieldwork Taken together the essays provide compelling evidence that educational studies programs in liberal arts colleges and universities constitute a vital component of the teacher education system in the United States

### **Engaging with Student Voice in Research, Education and Community** Nicole Mockler,Susan

Groundwater-Smith,2014-10-09 This work interrupts the current consulting students discourse that positions students as service clients and thus renders more problematic the concept of student voice in ways that it might be sustained as a democratic process It looks at student voice holistically across realms of classroom practices higher education practitioner

inquiry and policy formulation The authors render problematic the empowerment rhetoric that is the dominant and insufficient narrative justifying consulting children and young people They explore the many contradictions and ambiguities associating with recruiting and encouraging them to participate and the varying impacts of different circumstances on the ways in which student voice projects are enacted They perceive that it is possible for student voice projects to be subverted from both above and below as varying stakeholders with varying purposes struggle to manage and control projects Importantly the book reports on research that identifies and highlights conditions for initiating and sustaining student voice and include beyond school dimensions that consider young people as audiences who can inform community facilities their development and design as well as undergraduate students in universities These cases are not reported as celebratory but rather act as narratives that illuminate the many challenges facing those who chose to work with young people in authentic ways It both advances methodologies for engaging young people as active agents in the design and interpretation of research that concerns them and offers a critique of those methods that see young people as the objects of research where the data is mined for purposes that do not recognise that students are the consequential stakeholders with respect to decisions made in their interests

**Anthropology & Education Quarterly**, 2006      **Growing a Soul for Social Change** Tonya Huber-Warring, 2008-04-01 For readers new to the field of multicultural education and human relations education the recency of these publications heralded as seminal may be confusing for certainly the concepts building the field of multicultural education and human relations education have been around much longer True But for the first time we found the conceptual framework guiding principles and critical works across disciplines and fields in Smith's encyclopedic organization Because of the comprehensive nature of Pritchey Smith's knowledge bases they have been employed as the organizing themes for this volume I would clarify that I have not burdened authors to study Smith's analysis and then apply it to their works the categorization is my own And as is true of any topic the interpretation and application may be broadly applicable One of my major goals in founding this series has been to further develop the knowledge bases with voices from those in the trenches literally and figuratively and at the chalkface while proverbial for some parts of the world chalk remains a teaching staple in many regions of the world Throughout this volume authors will explore and research their own discoveries on this journey narratives of crossing cultures and developing communities reconceptualizing democracy and reinterpreting traditions seeking solidarity and sowing the seeds of social justice Through critical reflection in the shade of these giants the reader may discover Ming Fang's bamboo tree

[Metaphor and Analogy in Science Education](#) Peter J. Aubusson, Allan G. Harrison, Stephen M. Ritchie, 2006-06-28 Years ago a primary teacher told me about a great series of lessons she had just had The class had visited rock pools on the seashore and when she asked them about their observations they talked about it was like a factory it was like a church it was like a garden it was like our kitchen at breakfast time etc Each student's analogy could be elaborated and these analogies provided her with strongly engaged

students and a great platform from which to develop their learning about biological diversity and interdependence In everyday life we learn so many things by comparing and contrasting The use of analogies and metaphors is important in science itself and their use in teaching science seems a natural extension but textbooks with their own sparse logic do not help teachers or students David Ausubel in the 1960s had advocated the use of advance organisers to introduce the teaching of conceptual material in the sciences and some of these had an analogical character However research on the value of this idea was cumbersome and indecisive and it ceased after just a few studies In the 1980s research into children s conceptions of scientific phenomena and concepts really burgeoned and it was soon followed by an exploration of a new set of pedagogical strategies that recognised a student in a science class is much more than a tabula rasa     A Social Constructivist Approach to Translator Education Donald Kiraly, 2014-07-16 This is a book about the teaching and particularly the acquisition of translation related skills and knowledge Well grounded in theory the book also provides numerous examples drawn from the author s extensive classroom experience in translator education and foreign language teaching Kiraly uses a number of classroom case studies to illustrate his method including introductory courses in translation studies project based translation practice courses translation studies seminars as well as naturalistic foreign language learning classes for student translators The book is primarily geared toward translator educators and programme administrators as well as students of translation and will also be of interest to foreign language teachers who incorporate translation into their teaching to translation scholars and to others involved in the world of translation
