Education And The Political Order:

Education and the Political Order Ted Tapper, Brian Salter, 1978-03-16 **Hispanics and the U.S. Political System** Chris Garcia, Gabriel Sanchez, 2015-12-22 As the Hispanic population in the U S grows so too does its influence The general election in 2000 marked an era of increased influence and awareness by Hispanics in politics both as voters and politicians While it is clear that Latinos are influencing and changing politics the impact on politics in the U S is still not clear Authored by leading scholar F Chris Garcia and Gabriel Sanchez *Hispanics and the U S Political System Moving into the Mainstream* focuses on the historical contemporary and future role of Hispanics in the United States Teacher Education and the Political Matthew Clarke, Anne Phelan, 2017-01-12 *Teacher Education and the Political* is a striking book which addresses the nature and purpose of teacher education in a global context characterised by economic and political anxieties around declining productivity and social inclusion These anxieties are manifested in recent policy developments such as the promotion of professional standards the deregulation and marketisation of teacher education and the imposition of performance related regimes that tie teachers pay to outcomes in high stakes testing The book assesses the implications of such policies for the work of teachers as well as for teacher educators and those undertaking initial teacher training It is argued that these policy moves can be read as a depoliticising and de intellectualising of teacher education In this context they illustrate how contemporary theory can provide a language for critiquing recent developments and imagining new trajectories for policy and practice in teacher education Drawing on the work of theorists from Derrida and Mouffe to Agamben and Lacan this book argues for the need to maintain a space for intellectual autonomy as a critical dimension of the ethico political work of teachers Together these ideas and analyses provide examples of the power of negative thinking illustrating its capacity to unsettle comfortable truths and foreground the political nature of teacher education Current teachers teacher educators and school leaders will be particularly interested readers alongside those concerned with policy in the wider educational landscape **Latinos in the American Political System** Jessica L. Lavariega Monforti, 2019-03-14 This encyclopedia provides a comprehensive overview of the evolution of Hispanic Americans engaged in U S politics from increased visibility as governors and other lawmakers at the local state and federal levels to their growing importance as a voting constituency This encyclopedia comprehensively surveys the evolution of Latina o engagement in US politics as voters candidates lawmakers and public officials It is an authoritative resource for public library patrons high school students and undergraduates in a variety of curricular studies including political science civics American history and Latino studies The set s A Z entries were carefully selected and crafted to ensure thorough coverage of all of the individuals organizations cultural forces political issues and legal decisions that have combined to elevate the role of Latinos at the polls on the campaign trail in Washington and in mayors offices city councils school boards and statehouses all across the country In depth essays on the rising prominence of Latino Americans as voters candidates public officials

Education and the Political Tomasz Szkudlarek,2013-11-19 The essays in this collection address the relation between education and politics in new ways Rather than understanding education simply as the object of political decision making or as preparation for politics the authors of this volume see education as implicated in social conflicts and in the political processes that produce and change social structures Education then is a practice that reconfigures the relations between subjectivities and the political The collection focuses on several critical cases and theoretical debates where the relation between education and politics demands new articulations It explores the potential of theoretical languages proposed by Rancière Laclau Derrida Mouffe Bakhtin and other thinkers whose work has not yet been fully recognized in its pedagogical meaning **Education and Training Politics in Europe** Philipp Assinger,2020-09-11 In the past seventy years education and training have evolved from side issues of political cooperation to political priorities of the EU For three decades within this period they were promoted implicitly to enable the mobility of workers in the internal market Later on a European dimension of education and training has developed through mobility and cooperation programs and through the lifelong learning discourse Today a European policy space of education and training is unfolding which the EU is coordinating by the means of soft governance arrangements **Technology and Civility: The Skill Revolution in Politics** Heinz Eulau,1977

Education Policy and Power-Sharing in Post-Conflict Societies Giuditta Fontana,2016-08-24 This book explores the nexus between education and politics in Lebanon Northern Ireland and Macedonia drawing from an extensive body of original evidence and literature on power sharing and post conflict education in these post conflict societies as well as the repercussions that emerged from the end of civil war This book demonstrates that education policy affects the resilience of political settlements by helping reproduce and reinforce the mutually exclusive religious ethnic and national communities that participated in conflict and now share political power Using curricula for subjects such as history citizenship education and languages and structures like the existence of state funded separate or common schools Fontana shows that power sharing constrains the scope for specific education reforms and offers some suggestions for effective ones to aid political stability and reconciliation after civil wars *Education as a Political Tool in Asia* Marie Lall,Edward Vickers,2010-06-30 This book offers a fresh and comparative approach in questioning what education is being used for and what the effects of the politicisation of education are on Asian societies in the era of globalisation Education has been used as a political tool throughout the ages and across the whole world to define national identity and underlie the political rationale of regimes In

the contemporary globalising world there are particularly interesting examples of this throughout Asia ranging from the new definition of Indian national identity as a Hindu identity to contrast with Pakistan's Islamic identity to particular versions of nationalism in China Japan Singapore and Vietnam In Asia education systems have their origins in processes of state formation aimed either at bolstering self strengthening resistance to the encroachments of Western and or Asian imperialism or at furthering projects of post colonial nation building State elites have sought to popularise powerful visions of nationhood to equip these visions with a historical back story and to endow them with the maximum sentimental charge This book explores all of these developments emphasising that education is seen by nations across Asia as elsewhere as more than simply a tool for economic development and that issues of national identity and the tolerance or lack of it of ethnic cultural or religious diversity can be at least as important as issues of literacy and access Interdisciplinary and unique in its analysis this book will be of interest to scholars of political science research in education and Asian Studies
