Education and Work in Great Britain, Germany and Italy Annette Jobert, Catherine Marry, Helen Rainbird, Lucie Tanguy, 2013-05-13 This volume examines the multiple connections between education broadly defined and work through an analysis of the literature on the transition from school to work on vocational training and on the labour market It shows that concepts such as skill unemployment rates young people and the transition from school to work are socially constructed and are thought about in ways which are nationally specific This book is essential reading for students of European training systems and for those conducting comparative European research **Transitions from Education to Work in Europe**

Walter Müller, Markus Gangl, 2003-11-27 This text provides a comparative analysis of school to work transitions in EU member states It shows how differences in both European education and training systems as well as labour market institutions generated significant variation in the experiences of young people in the 1990s *Report Upon State Education in Great Britain, France, Switzerland, Italy, Germany, Belgium, and the United States of America* Richard Laishley, 1886
