The State of the Global Education Crisis UNESCO, United Nations Children's Fund, World Bank (the), 2021-12-09 The global disruption to education caused by the COVID 19 pandemic is without parallel and the effects on learning are severe The crisis brought education systems across the world to a halt with school closures affecting more than 1.6 billion learners While nearly every country in the world offered remote learning opportunities for students the quality and reach of such initiatives varied greatly and were at best partial substitutes for in person learning Now 21 months later schools remain closed for millions of children and youth and millions more are at risk of never returning to education Evidence of the detrimental impacts of school closures on children's learning offer a harrowing reality learning losses are substantial with the most marginalized children and youth often disproportionately affected Countries have an opportunity to accelerate learning recovery and make schools more efficient equitable and resilient by building on investments made and lessons learned during the crisis Now is the time to shift from crisis to recovery and beyond recovery to resilient and transformative education systems that truly deliver learning and well being for all children and youth The World Bank website

Left Behind: The Public Education Crisis in the United States Paul Jalbert, 2018-05-01 This book addresses the harmful influences that the cultural social economic political and ideological dimensions in current American society have upon the delivery of elementary secondary and university education It examines the effects of poverty funding at the local state and federal levels and racial and ethnic discrimination Arguing against the continuation of standardized testing an ill conceived methodology to measure the performance of children the author advocates more one on one teaching and evaluation He charges that students rights to education are not respected and in elementary and high school receive little in the way of instruction that translates into life skills and proposes what some of those skills should be A critique of the extreme ethnocentric approach to education in the United States *Left Behind* advocates strong instruction in the Humanities and foreign languages and the establishment of education abroad as a permanent program in high school and university The author identifies Capitalism as the basic influence that in the form of employing business model constructs has slowly transformed our children into obedient consumers Physical Education has waned and become a major contributor to adolescent obesity Seeking to replace children s complacency with critical thinking instruction the author demonstrates how the corporate mass media occupy their minds He also fears the erosion of the profession of teaching by an online instruction frenzy The book explores the possibilities for a viable nation wide education institution in which decision making is in the hands of teachers parents and

education experts instead of politicians and business people The remedies that could be taken up by ordinary people are accessible at the commonsense level what prevents change are the lack of political will and economic greed bolstered by the ideological power of the mass media
