Education, Religion, and the Common Good Martin E. Marty, Jonathan Moore, 2000-09-15 A historian explores the proper role of religion in schools responsible for shaping the next generation for enlightened citizenship Drawing upon a series of conversations he hosted among educators and religious leaders Marty draws a nuanced picture of the interrelationship between religious and educational concerns at all levels of schooling Public Theology Perspectives on Religion and Education Manfred L. Pirner, Johannes Lahnemann, Werner Haussmann, Susanne Schwarz, 2019-01-23 In order to draw out the relationship between publicly oriented Christianity and education this book demonstrates that education is an important method and prerequisite of public theology as well as an urgent object of public theology research's attention Featuring work from diverse academic disciplines including religion education theology philosophy and religious studies this edited collection also contends with the educational challenges that come with the decline of religion on the one hand and its transformation and regained public relevance on the other Taken together the contributions to this volume provide a comprehensive argument for why education deserves systematic attention in the context of public theology discourse and Religion and Teaching Ronald D. Anderson, 2013-09-05 This text engages preservice and practicing teachers in vice versa considering some of the complex issues related to religion and teaching that all educators face in their interactions with students parents administrators and fellow teachers The questions are not just about what is legal and what is not but how a teacher should act in the best interests of all students both those who are religious and those who are not This book does not provide answers Its goal is to cause readers to reflect deeply on issues related to their professional decisions and actions regarding religion and teaching Religion and Teaching is pertinent for all prospective and practicing teachers at any stage in their teaching careers It can be used in any undergraduate or graduate course that addresses issues of religion and teaching

Education, Religion and Diversity L. Philip Barnes, 2014-02-05 In this thoughtful and provocative book Philip Barnes challenges religious educators to re think their field and proposes a new post liberal model of religious education to help them do so His model both confronts prejudice and intolerance and also allows the voices of different religions to be heard and critically explored While Education Religion and Diversity is directed to a British audience the issues it raises and the alternative it proposes are important for those educators in the United States who believe that the public schools have an important role in teaching students about religion Walter Feinberg Professor Emeritus of Education Policy Organization and Leadership at the University of Illinois Urbana Champaign Philip Barnes offers a penetrating and lucid analysis of the strengths and weaknesses of modern religious education in Britain He considers a range of epistemological and methodological issues and identifies two contrasting models of religious education that have been influential what he calls a liberal and a postmodern model After a detailed review and criticism of both he outlines his own new post liberal model of religious education one that is compatible with both confessional and non confessional forms of religious education yet takes

religious diversity and religious truth claims seriously Essential reading for all religious educators and those concerned with the role of religion in schools Bernd Schr der Professor of Practical Theology and Religious Education University of G ttingen What place if any does religious education have in the schools of an increasingly diverse society This lucid and authoritative book makes an incisive contribution to this crucial debate Roger Trigg is Emeritus Professor of Philosophy University of Warwick and Senior Research Fellow Ian Ramsey Centre Oxford The challenge of diversity is central to education in modern liberal democratic states and religious education is often the point where these differences become both most acute and where it is believed of all curriculum subjects resolutions are most likely to be found Education Religion and Diversity identifies and explores the commitments and convictions that have guided post confessional religious education and concludes controversially that the subject as currently theorised and practised is incapable of challenging religious intolerance and of developing respectful relationships between people from different communities and groups within society It is argued that despite the rhetoric of success which religious education is obliged to rehearse in order to perpetuate its status in the curriculum and to ensure political support a fundamentally new model of religious education is required to meet the challenge of diversity to education and to society A new framework for religious education is developed which offers the potential for the subject to make a genuine contribution to the creation of a responsible respectful society Education Religion and Diversity is a wide ranging provocative exploration of religious education in modern liberal democracies It is essential reading for those concerned with the role of religion in education and for religious and theological educators who want to think critically about the aims and character of religious education **Catholic Education: Distinctive and Inclusive** J. Sullivan, 2013-03-09 How coherent is the claim that Catholic education is both distinctive and inclusive This question so crucial both for the adequate articulation of a raison d tre for Catholic schools all over the world and also for the promotion of their healthy functioning has not hitherto been addressed critically Here it receives penetrating analysis and constructive resolution in a comprehensive treatment that integrates theological philosophical and educational perspectives The argument draws on wide ranging scholarship offering new insights into the relevance for Catholic education of thinkers whose work has been relatively neglected The advance in understanding of how distinctiveness relates to inclusiveness is underpinned by the author's lengthy experience of teaching and leadership in Catholic schools it is further informed by his extended and continuing dialogue with Catholic educators at all levels and in many different countries Education, Religion, and Ethics -A Scholarly Collection Dianne Rayson, 2023-04-18 This collection draws on research in educational areas displaying best practice pedagogy theoretical and practical underpinned by philosophy empirical science and neuroscience among other disciplines It focusses especially on implications for higher education school education professional ethics and religion Higher education exploration is on the diminution of the humanities and implications for the range of knowledge needed for future citizenship The work includes a revisioning of higher education s purpose especially the changing role of the doctorate

and its examination The focus on school education takes the same pedagogical lens to humanities and social sciences examining values education and religious studies Ethical issues include colonisation and decolonisation especially around the concept of land and ramifications for intercultural studies. The ethics and practice of teaching about life and death issues in medical education are explored in light of research in dialogic consensus. The religion section includes research on interfaith education especially concerning Islam and eco theological education especially focussed on climate change Contributors are academic colleagues or former doctoral students of Terence J Lovat University Professor Australia UK and Canada whose internationally acclaimed research straddles these areas Many of the contributors hold positions of influence in the academic or professional world while others bring their newly minted doctoral research to the content The intended readership includes academics and doctoral students across education ethics religion social studies ecology health and medicine indigenous studies and international affairs This collection published in honour of Emeritus Professor Terence Lovat provides rich insights into the scope and multidisciplinary depth of his scholarship A philosopher of education whose main work has centred on curriculum theory and values education and ethics in education Lovat's scholarship reminds us that the education of children and young people must be concerned with more than academic attainment In emphasising education as a holistic and moral endeavour one involving hearts and minds Lovat has consistently advocated for the provision of opportunities for young people to extend their horizons beyond the school environment to engage with issues in society that go beyond academic learning Professor Lovat has also made a major and longstanding contribution to the development of Studies of Religion in schools and to the theology and history of Islam and Islamic Education In traversing Lovat's significant and remarkable contributions to education religion and ethics and the links between them this book serves as a testament to a highly esteemed scholar Associate Professor Deborah Henderson Queensland University of Technology Australia Oxford Handbook of Religion and Education Liam Francis Gearon, Arniika Kuusisto, 2025-04-29 The Oxford Handbook of Religion and Education offers a multi disciplinary work of scholarship and research highlighting the global significance of a critical interface of cultural and social political and theological importance Drawing on historical perspective and contemporary reflection the collection provides a uniquely transformative analysis of why the interface of religion and education is of such critical significance With contributions from some of the leading thinkers in the field this Handbook presents a cumulatively powerful argument to reassess the complexities of the intersection of religion and education With ambitious and yet accessible intellectual engagements the Handbook here furthers a central thesis that the interface of religion and education is not merely a matter of arcane disputation about a domain of ancient origin or a rudimentary matter of formal educational process but a vibrant domain of critical contestation fundamental to knowing understanding and living in the modern world Religion and Everyday Life and Culture Vincent F. Biondo, Richard D. Hecht, 2010-03-25 This intriguing three volume set explores the ways in which religion is bound to the practice of daily life and how daily life is

bound to religion In Religion and Everyday Life and Culture 36 international scholars describe the impact of religious practices around the world using rich examples drawn from personal observation Instead of repeating generalizations about what religion should mean these volumes examine how religions actually influence our public and private lives on the ground on a day to day basis Volume one introduces regional histories of the world's religions and discusses major ritual practices such as the Catholic Mass and the Islamic pilgrimage to Mecca Volume two examines themes that will help readers understand how religions interact with the practices of public life describing the ways religions influence government education criminal justice economy technology and the environment Volume three takes up themes that are central to how religions are realized in the practices of individuals In these essays readers meet a shaman healer in South Africa laugh with Buddhist monks sing with Bob Dylan cheer for Australian rugby and explore Chicana and Iranian art <u>Inclusive Pluralism</u> Bob Fu,2020-12-16 Long live the red terror This and other political slogans were used by China s communist rulers as leverage for conflict and conflict management during 1949 China's Cultural Revolution movement understandably fueled anger fear and terror among Chinese citizens Currently contrary to the positive facade that China under the control of the Communist Chinese Party CCP tries to project regarding human rights a dark reality reveals a brutal authoritarian state with no concern for religious freedom What guiding philosophy could best help procure provide and protect religious freedom for all in a post communist Christianized democratic China Bob Fu argues that while various Christianity oriented theories may appear promising they fail to provide an adequate pluralistic foundation for protecting the religious freedoms of people of all faiths and none The predominant theory of political liberalism in the West likewise fails to prove sufficiently inclusive for all faiths and worldviews As an alternative the author defends Baorong Duoyuan inclusive pluralism his own contextualized theory modeled after principled pluralism. This model he believes has the potential to help ensure that religious freedom for all becomes a reality Politics, Religion, and the Common Good Martin E. Marty, Jonathan Moore, 2000-03-10 The future of America in many ways depends upon an understanding of the proper role of religion in our shared life as a republic Discussions and debates on the topic have too often generated noise platitudes stereotypes name calling and the distortion of vitally important issues instead of constructive conversation among citizens until now Of all the voices commenting about American religion today none is more credible or better known than that of historian Martin E Marty A respected scholar author editor and media commentator he has perhaps better than anyone else in the field a deep grasp on the complex issues surrounding public religion There is a Crack in Everything—Education and Religion in a Secular Age K. H. (Ina) ter Avest, 2019-11-22 There are two constants in academic and theological discourse throughout history they are the debate around secularization and the dialogue concerning the intersection of religion and education Each age has had its debate about modernizing forces that drive concerns of impending secularization In this publication this theme is approached from perspectives of teachers of students of policy makers and situated in a politico
