including network types value of networks path dependencies and lock ins as well as a detailed critique of these frameworks is provided We then discuss several possible avenues to overcome these challenges some of which relate to the optimal boundaries of the firm as well as some which attempt to tackle market externalities From these a market based framework will be developed as a guideline for radical product introductions into network economies We analyse business cases in light of this framework in a selection of historic examples In addition as we find that contradictory arguments abound in chapter three a second approach is proposed tentatively as basis for further research Besides it s theoretic approach this thesis also provides real world examples from different geographic areas such as the U S Europe and Japan A special emphasis will be put on the market of payment solutions now emerging in Europe and in particular on the German start up Paybox net AG
