Educating The Entire Person:

Educating the Entire Person Ron Dultz, 1993 This book maintains that much of what children and adolescents are taught in school is of limited use to them in succeeding in life It notes that although most school curricula focus on factual knowledge and cultural enrichment they fall short in providing students with an education that focuses on individual abilities and inclinations financial self sufficiency moral development and self identity The book advocates a teaching and learning philosophy that makes students largely responsible for their own education and development so that they can function as independent self sufficient adults in society Its central premise is that students need to learn to think for themselves develop a worthwhile concept of the meaning of life and learn to maneuver well in their environment MDM **Whole Person**

Centering Humanism in STEM Education Bryan Dewsbury, Susannah McGowan, Sheila S. Jaswal, Desiree Forsythe, 2024-09-24 Research demonstrates that STEM disciplines perpetuate a history of exclusion particularly for students with marginalized identities This poses problems particularly when science permeates every aspect of contemporary American life Institutions repeated failures to disrupt systemic oppression in STEM has led to a mostly white cisgender and male scientific workforce replete with implicit and or explicit biases Education holds one pathway to disrupt systemic linkages of STEM oppression from society to the classroom Maintaining views on science as inherently objective isolates it from the world in which it is performed STEM education must move beyond the transactional approaches to transformative environments manifesting respect for students social and educational capital We must create a STEM environment in which students with marginalized identities feel respected listened to and valued We must assist students in understanding how their positionality privilege and power both historically and currently impacts their meaning making and
