The Liberal Education of Charles Eliot Norton James Turner,2002-12-11 A superbly crafted and absorbing biography of a seminal figure in nineteenth century American culture In this impressive book Turner dusts off what might seem a stuffy subject to reveal a cultural adventure *Journal of American History* Liberal Education and Citizenship in a Free Society Justin Buckley Dyer,Constantine Christos Vassiliou,2023-07-24 The liberal arts university has been in decline since well before the virtualization of campus life increasingly inviting public skepticism about its viability as an institution of personal civic and professional growth New technologies that might have brought people together have instead frustrated the university s capacity to foster thoughtful citizenship among tomorrow s leaders and exacerbated socioeconomic inequalities that are poisoning America s civic culture With *Liberal Education and Citizenship in a Free Society* a collection of 19 original essays editors Justin Dyer and Constantine Vassiliou present the work of a diverse group of scholars to assess the value of a liberal arts education in the face of market technological cultural and political forces shaping higher learning today

Education of an American Liberal Lucille Bernheimer Milner,1954 The Future of American Higher Education Joseph L. DeVitis,2023-07-03 This impressive anthology presents the reader with an introduction to a gallery of public intellectuals through the critical eyes of a wide array of contributing writers from various academic fields Both the latter and the public intellectuals themselves are responding to the state of American higher education Importantly most of them there are a few public intellectuals in the book who cling closer to the status quo do not separate colleges and universities from the political economic and social currents of American society They attack the

realities of growing social inequality the intractable presence of institutional racism and the recurrent reliance on the free market as the arbiter of value Public intellectuals assess the impact of these social factors on the organization and practices of contemporary American higher education They force the reader to consider serious challenges to the current arrangement of higher learning and as such they ask us to assess the efficacy of their respective perspectives Do they present the reader with insight or idealism pathways or dead ends This compendium provides an abundance of ideas for higher education leaders policy makers faculty members trustees and governmental officials as well as social theorists and graduate students interested in higher education careers Richard Guarasci President Emeritus of Wagner College Just as our society is polarized higher education is no less divided as to its mission and purpose whether it should be preparing students for employment or for engagement as citizens whether it should be corporatist and profit driven or promote intellectual curiosity and independent thinking and whether it should pursue a neoliberal agenda or promote a liberal education Whose scholarship culture and epistemologies should be validated Should it be a private or a public good Preserve tenure or erode it What role should colleges and universities play in addressing economic inequality and systemic racism The answers to these questions are critical for the future of our society as our universities and colleges are the nurseries of the values and philosophies that shape it The chapters in this book review the contributions of seventeen public intellectuals who have been at the forefront of these issues and significantly contributed to these debates Each describes the genesis of each scholar's ideas and presents and critiques his or her core insights and arguments The seventeen public intellectuals represent a spectrum of opinion from the conservative to the progressive At this pivotal moment when much of higher education is in economic crisis and public trust in it has been eroded this book offers a robust entry point for considering the options and directions ahead for anyone in a leadership position The book will also be valuable for higher education courses to stimulate debate about these critical issues and introduce readers to the seminal thinkers in the field Public Intellectuals Presented Stanley Aronowitz Michael B. Ruben Marc Bousquet Patricia Hill Collins Lori Patton Davis William Deresiewicz Stanley Fish Marybeth Gasman Henry Giroux Sara Goldrick Rabb Amy Gutmann Russell Jacoby Randall Kennedy David Kirp David F. American Liberalism John McGowan, 2007 An engaging and informative discussion on liberalism offers a clear vision of liberalism's foundational values as America's best guarantee today of liberty and the peace in which to exercise it *John Dewey and the High Tide of American Liberalism* Alan Ryan, 1995 When John Dewey died in 1952 he was memorialized as America's most famous philosopher revered by liberal educators and deplored by conservatives but universally acknowledged as his country's intellectual voice Many things conspired to give Dewey an extraordinary intellectual eminence He was immensely long lived and immensely prolific he died in his ninety third year and his intellectual productivity hardly slackened until his eighties Professor Alan Ryan offers new insights into Dewey's many achievements his character and the era in which his scholarship had a remarkable impact He investigates the question of what an American audience wanted from a public

philosopher from an intellectual figure whose credentials came from his academic standing as a philosopher but whose audience was much wider than an academic one Ran argues that Dewey's religious outlook illuminates his politics much more vividly than it does the politics of religion as ordinarily conceived He examines how Dewey fit into the American radical tradition how he was and was not like his transatlantic contemporaries why he could for so long practice a form of philosophical inquiry that became unfashionable in England after 1914 at the latest

Western Higher Education in Asia and the Middle East Hassan Bashir, Stephen Keck, Kevin Gray, 2016-12-21 This multidisciplinary volume highlights the transformed nature of the relationship between higher education and society in the 21st century In particular it argues that the development of the global university especially in the non western world has transformed the traditional understanding of the relationship between higher education and society This has important implications for the relations of state as education has not only become an object of national development policy but for many states an important export The history of the university reflects the decisive social transformations which have given definition and identity to both new nations and modern societies In the post war period universities in the industrialized world underwent a radical shift The mass expansion of higher education ensured that universities were no longer centers designed to train youth to assume the leadership positions held by previous generations Instead universities were to become centers where job skills could be imparted and knowledge produced refined and used in the newly emerging Cold War economies and where students could develop the skills necessary for employment in a changing world Rather than focusing on the refinement of future leaders the task of the university became linked to the development of economically exploitable technical knowledge A shift of comparable magnitude is now ongoing in the nature of higher education itself Globalization has led to the growth of knowledge communities around the world mirroring the rise of centers for global finance in previous decades In the Middle East and Asia the demands of the knowledge based economy have led to the opening of new indigenous universities and branch campuses and partnerships with established European and North American universities Education City in Qatar for instance has received or been pledged more than 200 billion dollars since its inception The growth of new indigenous universities has altered the traditional role of the university further increasing the emphasis on courses which are close to the marketplace These new partnerships have contributed to the creation of what is now referred to as the global university

The Meaning of a Liberal Education Everett Dean Martin, 1926

China's Higher Education Reform and Internationalisation Janette Ryan, 2011-03-07 Despite radical and fundamental reform of the Chinese higher education system very little is known about this outside China The past decade has seen radical reform of all levels of China's education system as it attempts to meet changing economic and social needs and aspirations this has included transformation of university curricula pedagogy and evaluation measures rapidly increasing joint research and degree programmes between Chinese universities and universities abroad and very large numbers of Chinese students studying at universities outside China This book describes

the historical cultural intellectual and contemporary background and contexts of the reform and internationalisation of higher education in China It discusses these changes outlines the challenges posed by the changes for university administrators faculty researchers students and those working with Chinese academics and students in China and abroad and assesses the impact and evaluates the success of the changes Most importantly it considers how this mobility of people and ideas across educational systems and cultures can contribute to new ways of working and understanding between Western and Chinese academic cultures The book is a companion to Education Reform in China which focuses on reform at the early childhood primary and secondary levels **Higher Education** ,1963 **Liberal Education and the Small University in Canada** Christine Storm,1996 Small liberal arts institutions that focus on the undergraduate student have received little attention in the literature on higher education in Canada In this collection of essays contributors set out to redress the situation Focusing on Mount Allison University in New Brunswick they question among other things whether the values and integrity of liberal arts teaching are being preserved and make a case for the important role liberal education at the small university plays in higher education in Canada **American Education** ,1981 **Undergraduate Science, Mathematics and Engineering Education** National Science Board (U.S.). Task Committee on Undergraduate Science and Engineering Education,1987 **What's Wrong with American Education?** David Snedden,1927 The Relevance of Higher Education Timothy Simpson,2013-09-24 Most statements today about higher education begin with the assumption that it should be relevant That it should be relevant however does not settle the matter The significance of relevance depends on the power of something else that is more fundamental Relevance may be a true standard of judgment but it does not stand by itself Assuming higher education should be relevant the question emerges relevant to what Why How At what costs And relevant in what sense These are some of the central questions animating this study The Relevance of Higher Education Exploring a Contested Notion edited by Timothy L Simpson examines the relevance of higher education by bringing together the work of historians political scientists and educational philosophers The contributors probe the meaning of relevance in its many guises providing an historical and philosophical account of the roots of this concept and its impact on the institution of higher education Furthermore The Relevance of Higher Education provides a critical evaluation of the impact of relevance on our understanding of the political and economic relationship between higher education and society This study suggests views of relevance that could guide the future of higher education By providing penetrating analysis this text thoroughly explores relevance and its underlying assumptions potential implications and long lasting effects on higher education and society The Relevance of Higher Education provides the tools necessary to develop a rich framework for understanding relevance and its impact on higher education and society **Resources in Education** ,1998 **The Demands of Liberal Education** Meira Levinson,1999-09-23 The Demands of Liberal Education analyses and applies contemporary liberal political theory to certain key problems within the field of educational theory Levinson examines problems centred around determining appropriate

educational aims content and institutional structure and argues that liberal governments should exercise a much greater control over education than they now do Combining theoretical with empirical research this book will interest and provoke scholars policy makers educators parents and all citizens interested in education politics The University in a Corporate Culture Eric Gould, 2003-01-01 Over the past century higher education in the United States has developed an increasingly powerful corporate ethos as institutions compete for students faculty and funding This book examines how the liberal democratic principles driving higher education often conflict with market pressures to credential students and offer knowledge that has a clear exchange value Eric Gould who has been both academician and college administrator argues that the failure to structure the curriculum so that it integrates responsible social idealism and humanism with economic and cultural needs constitutes the moral crisis of the university Gould analyzes the economics and politics of higher education showing how student consumerism culture wars faculty alienation trustee activism and a split between the concepts of culture and society have all resulted from the unholy alliance between pragmatism corporatism and liberalism in higher education He asserts that what is needed is a general education for undergraduates that promotes the ability to critique power relations including those within higher education so that students can understand how social forces and their embodiment of ideas ideologies and claims for truth shape contemporary public philosophy
