Education and the Future of Japan Michael Dawson Stephens,1991 *The Future of Japan* W. Petrie Watson,1907

OECD Reviews of Tertiary Education: Japan 2009 OECD,2009-03-05 In many OECD countries tertiary education systems have experienced rapid growth over the last decade With tertiary education increasingly seen as a fundamental pillar for economic growth these systems must now address the pressures of a Japan's Future and a New Meiji Transformation Ken Coates,Kimie Hara,Carin Holroyd,Marie Söderberg,2019-03-27 Bringing together the work of sixteen international Japan specialists and scholars this book analyzes Japan s culture and history to reflect on the critical policy decisions and national commitments required for the country to continue to succeed Comparing the current situation with the uncertainties of the late nineteenth century this book investigates the possibility and desirability of a New Meiji Transformation in Japan Set in the context of perceived demographic ecological fiscal and political decline in Japan it explores what a New Meiji initiative would look like in the twenty first century and whether a new era of renewal is needed to maintain and improve quality of life An interdisciplinary volume this book covers contemporary issues in Japanese foreign defense and nuclear strategies as well as its aging population higher education structure and environmental policies As such Japan s Future and a New Meiji Transformation will be of great interest to students and scholars of Japanese politics economics and history as well as Asian Studies more generally *Japan's International Cooperation in Education* Nobuko Kayashima,Kazuo Kuroda,Yuto Kitamura,2022-03-31 This book records the history of Japan s international cooperation in education from the 1950s to 2020 It provides a crucial overview of the nearly 70 years since Japan began engaging in international cooperation in education in order to record and document these efforts that range from basic to higher education to technical and vocational education and training and the large numbers of people involved in their respective areas of activity and specialization The book provides useful indicators for exploring new forms of education cooperation in this age of global governance and beyond The authors include not only researchers but also field practitioners such as personnel from the Japan International Cooperation Agency and NGOs Chapters 1 3 5 9 12 and 15 are available open access under a Creative Commons Attribution NonCommercial NoDerivatives 4 0 International License via link [springer.com](https://www.springer.com)

Education in Japan Edward R. Beauchamp,Richard Rubinger,2017-12-12 This book first published in 1989 includes essays on a number of the most important topics in Japanese education as well as the highly selected and annotated bibliographies It is the editors belief that understanding educational matters requires insight into the historical context and have therefore placed contemporary Japanese educational matters in historical perspective **Japanese Education Reform** Christopher P. Hood,2003-09-02 The Japanese education system has attracted increasing attention over the past 20 years largely due to the belief that it has been central to Japan s economic growth Many have felt however that the system is stunted by an inability or perhaps even on an incapacity to change This study challenges these contentions It examines the

reform policies implemented by Prime Minister Nakasone during the 1980s and argues that not only has the system changed considerably as a result of Nakasone's work but that it continues to do so. It analyses the key areas of the education reform debate in particular internationalism, government control of education, increased liberalization and various social problems and considers the degree to which response to them have been successful. This book will be of great interest to all those interested in the Japanese educational system.

Medical Education for the Future Alan Bleakley, John Bligh, Julie Browne, 2011-02-21 The purpose of medical education is to benefit patients by improving the work of doctors. Patient centeredness is a centuries old concept in medicine but there is still a long way to go before medical education can truly be said to be patient centered. Ensuring the centrality of the patient is a particular challenge during medical education when students are still forming an identity as trainee doctors and conservative attitudes towards medicine and education are common amongst medical teachers making it hard to bring about improvements. How can teachers, policy makers, researchers and doctors bring about lasting change that will restore the patient to the heart of medical education? The authors, experienced medical educators, explore the role of the patient in medical education in terms of identity, power and location. Using innovative political, philosophical, cultural and literary critical frameworks that have previously never been applied so consistently to the field, the authors provide a fundamental reconceptualisation of medical teaching and learning with an emphasis upon learning at the bedside and in the clinic. They offer a wealth of practical and conceptual insights into the three way relationship between patients, students and teachers, setting out a radical and exciting approach to a medical education for the future. The authors provide us with a masterful reconceptualization of medical education that challenges traditional notions about teaching and learning. The book critiques current practices and offers new approaches to medical education based upon sociocultural research and theory. This thought provoking narrative advances the case for reform and is a must read for anyone involved in medical education. David M. Irby, PhD, Vice Dean for Education, University of California, San Francisco School of Medicine and co-author of *Educating Physicians: A Call for Reform of Medical School and Residency*. This book is a truly visionary contribution to the Flexner centenary. It is compulsory reading for the medical educationalist with a serious concern for the future and for the welfare of patients and learners in the here and now. Professor Tim Dornan, University of Manchester Medical School and Maastricht University Graduate School of Health Professions Education.

European Higher Education Area: The Impact of Past and Future Policies Adrian Curaj,Ligia Deca,Remus Pricopie,2018-07-03 This

volume presents the major outcomes of the third edition of the Future of Higher Education Bologna Process Researchers Conference FOHE BPRC 3 which was held on 27-29 November 2017. It acknowledges the importance of a continued dialogue between researchers and decision makers and benefits from the experience already acquired this way enabling the higher education community to bring its input into the 2018-2020 European Higher Education Area EHEA priorities. The Future of Higher Education Bologna Process Researchers Conference FOHE BPRC has already established itself as a landmark in the European higher education environment. The two previous editions 17-19 October 2011, 24-26 November 2014 with approximately 200 European and international participants each covering more than 50 countries each were organized prior to the Ministerial Conferences thus encouraging a consistent dialogue between researchers and policy makers. The main conclusions of the FOHE Conferences were presented at the EHEA Ministerial Conferences 2012 and 2015 in order to make the voice of researchers better heard by European policy and decision makers. This volume is dedicated to continuing the collection of evidence and research based policymaking and further narrowing the gap between policy and research within the EHEA and broader global contexts. It aims to identify the research areas that require more attention prior to the anniversary 2020 EHEA Ministerial Conference with an emphasis on the new issues on rise in the academic and educational community. This book gives a platform for discussion on key issues between researchers various direct higher education actors decision makers and the wider public.
