Liberalism, Communitarianism and Education Patrick Keeney,2016-05-06 Communitarian thinkers have identified important deficiencies in liberal thought in particular the limits of the account of justice given in liberal theories This book makes transparent for the reader the implications that the liberal account of justice has for our ways of thinking about education Citing the work of John Rawls as the principal expression of contemporary liberal thought Keeney argues that there are certain intractable tensions between the view of the individual given in rights based theories of justice and a certain valuable conception of education which in the West has traditionally been termed a liberal or general education and concludes that ideals of a liberal education are only available to

a political ethic which is capable of articulating a public conception of virtue and the good *A Christian Education in the Virtues* James Arthur, 2021-06-24 *A Christian Education in the Virtues* examines the connection between human nature and human flourishing. It draws on ancient and medieval sources to explore the formation of the person based on a Christian anthropology, emphasising the communal nature of the virtuous life and provides a richer approach to the question of contemporary character education. The book argues that the only way to understand and construct our character virtues is to have a clear picture of what is the purpose and meaning of human life. It highlights the importance of engaging with moral issues and makes the case that for Christian educators human flourishing is inseparable from God's active relationship to human beings. The book also explores a teleological approach to character education goals. To educate the whole person in the light of an all-embracing Christian worldview is challenged by secular and liberal ideology and is often seen as irrational to the modern mind. Overall, the text seeks to demonstrate that many aspects of a Neo-Aristotelian Thomist theoretical underpinning for Christian character education holds out a viable option for Christians. It therefore argues the case for the educational potential of Christian character education. This important book will be essential reading for academics, researchers and students in the fields of character and virtue education, religious education and the philosophy of education.
