Education Training And The Future Of Work I:

Education, Training and the Future of Work I John Ahier, Geoff Esland, 2013-10-18 A central claim of this volume is that public policy in education and training can only be properly understood if it is seen in relation to prevailing economic and employment conditions It has become increasingly apparent that the neo liberal economic policies pursued by Western governments during the 1980s and 1990s have led to a growing world wide work crisis Unemployment levels particularly in Europe remain persistently high and for those in employment job insecurity and long working hours have become the norm The response of UK governments has been to promote flexibility in employment practices while proclaiming the importance of improving skill levels through education and training This volume challenges the adequacy of such an approach and asks whether reliance on education and training reforms without additional political intervention in economic processes is capable of reversing current trends Issues covered in this reader include the impact of globalization on employment trends neo liberal and neo Keynesian approaches to employment policy political reforms in education and training institutions the impact of flexibilization on private life and the family The two volumes in this series are readers for the Open University course Education Training and the Future of Work E837 a module of the MA in Education The companion volume is Education Training and the Future of Work II Developments in Vocational Education and Training John Ahier is Lecturer in Education at the Open University Geoff Esland is Director of the Centre for Sociology and Social Research at the Open University and Course team Chair of E837 Education, Training and the Future of Work II Mike Flude, Sandy Sieminski, 2013-10-18 This volume focuses on the recent changes in education and training policy mainly in the UK The considerable developments of past years and the ways in which they have affected both education and training are examined The contributors analyse the methods by which we educate our workforce and look closely at the kind of training now offered to those in work The chapters in this reader cover the role of the state how economic factors influence education national education and training policy the political factor Other countries including Germany are looked at and there is reflection on the ways in which the new industry led qualifications such as NVQs have fared There is careful analysis as to how much the political climate of the time influenced developments There is thorough research to back up claims made throughout the book and many practical examples are referred to What emerges is an incisive examination of current trends in education and the workplace The Future of Work in Europe Ignace Glorieux, Paul Littlewood, Ingrid Jonsson, 2017-11-28 Recent years have witnessed major changes to the workplace across Europe The speed of these changes requires constant monitoring and reappraisal In this book recent trends are analyzed and their consequences discussed within a socio historical context which also reveals underlying patterns of continuity The trends analyzed include the presence of high rates of endemic unemployment and underemployment particularly amongst the young the growth of insecure and precarious employment sweeping changes to the regulation of and organization of work the diminution in the availability of manual work

and the growth of white collar service sector jobs the growing participation of women in paid employment the introduction of new organizational forms and new forms of management the accelerating use of IT the growth in demand for educational and vocational qualifications by employers the increasing influence of European legislation on work retirement health safety etc the growing importance of voluntary sector work The contributors to the volume present both primary research and a wide ranging survey and analysis of recent major contributions in the field Detailed empirical material is included from Belgium Finland Germany The Netherlands Spain Sweden the UK and the EU more generally Thus the book aims to provide a current overview of the nature of work from a pan European perspective illuminated by up to the minute field research
