Leithwood,P. Hallinger,2012-12-06 The first International Handbook of Educational Leadership and Administration Leithwood et al was published in 1996 and

quickly became something of a best seller for reference works within education. Such success we suggest was at least partly due to the unprecedented global waves of concern for improving schools launched in the mid 1980 s combined with a widespread belief in leadership as the single most powerful contribution to such improvement. The roots of this belief can be found in evidence produced by the early effective schools research although there is a romance with leadership as an explanation for success in many non school enterprises as well. During the two year period during which this current handbook was being written activity in the realms of school leadership school improvement and leadership development gained further momentum. The English government created its new National College of School Leadership and several Asian nations announced new initiatives in leadership selection preparation and development.

Educational Leadership Clive Dimmock, Allan Walker, 2005-06-03 A highly recommendable and powerful work I have found this book to be both a revelatory mirror on past events and an inviting window to future prospects. I am certain that it will be of equal or greater value to all those involved and interested in the tangled complexities and inherent rewards of educational leadership particularly within international or cross cultural contexts. Daniel H Jarvis International Review of Education Clive Dimmock and Allan Walker's books is a valuable addition to the overcrowded literature on leadership. This is a useful and important book because citizenship globalization and the tensions with nationality should be the concern of all who lead any school even monofaith monoethnic and monolingual schools. Tim Brighouse TES Friday The authors offer a rigorous and systematic analysis based on careful definition illustration and discussion which demonstrates the importance of understanding culture leadership and their interaction in different contexts in doing so they provide a powerful antidote to the simplistic export of ideas and lay foundations for a more sophisticated conceptual framework for the study of educational leadership. John West Burnham International Leadership Centre University of Hull This key text in educational leadership focuses on the significance of the context and culture of schools. The book addresses the growing recognition of cultural differences between societies and the resultant differences in schooling. It also deals with vital issues relating to multicultural education and the leadership of multicultural schools. Drawing on their first hand experience the authors explore the differences evident in classroom teaching and learning as well as organizational leadership and management aspects of schools. They show how such differences can make over reliance on Anglo American approaches misleading ineffective and restrictive. Key features of the book include a methodology to support the emerging field of international and comparative educational leadership and management in depth comparative analysis of Anglo American and Asian schooling and educational management the leadership of multi cultural schools. This book is essential reading for professionals and students of educational leadership and management as well as administrators.
