**The Culture of Piracy, 1580-1630** Claire Jowitt,2016-12-05

Listening to what she terms unruly pirate voices in early modern English literature in this study Claire Jowitt offers an original and compelling analysis of the cultural meanings of piracy By examining the often marginal figure of the pirate and also the sometimes hard to distinguish privateer Jowitt shows how flexibly these figures served to comment on English nationalism international relations and contemporary politics She considers the ways in which piracy can sometimes in surprising and resourceful ways overlap and connect with rather than simply challenge some of the foundations underpinning Renaissance orthodoxies absolutism patriarchy hierarchy of birth and the superiority of Europeans and the Christian religion over other peoples and belief systems Jowitt s discussion ranges over a variety of generic forms including public drama broadsheets and ballads prose romance travel writing and poetry from the fifty year period stretching across the reigns of three English monarchs Elizabeth Tudor and James and Charles Stuart Among the early modern writers whose works are analyzed are Heywood Hakluyt Shakespeare Sidney and Wroth and among the multifaceted historical figures discussed are Francis Drake John Ward Henry Mainwaring Purser and Clinton What she calls the semantics of piracy introduces a rich symbolic vein in which these figures operating across different cultural registers and appealing to audiences in multiple ways represent and reflect many changing discourses political and artistic in early modern England The first book length study to look at the cultural impact of Renaissance piracy *The Culture of Piracy 1580 1630* underlines how the figure of the Renaissance pirate was not only sensational but also culturally significant Despite its transgressive nature piracy also comes to be seen as one of the key mechanisms which served to connect peoples and regions during this period

*The Rhetoric of Credit* Ceri Sullivan, 2002 Recent influential work on Jacobean city comedies by Jean Christophe Agnew and Douglas Bruster in particular is confined to the well worn topics of urban alienation and the avaricious merchant drawing on 1550s sermons and tracts against usury In this model where social credit is deemed to circulate without limit the city comedy's specific reference to contemporary ideas of trade cash and credit is lost The plays are reduced to moral satires against greed humoural comedies of the hollow self or self referencing literary artifacts which create and interact with a coterie audience Aging rants against avarice might account for earlier interludes which mock usurers and misers but not for the slick formal pleasures of the city comedy bringing together gull courtesan prodigal gallant virgin daughter and jealous citizen father or husband
