Supper at Emmaus Glenn W. Olsen, 2016 Supper at Emmaus traces various important intellectual topics from the ancient world to the modern period Generally as in its treatment of the question of whether the long standing contrast between cyclical and linear views of history is helpful it introduces important thinkers who have considered the question A preoccupation of the book is the appearance and reappearance across the centuries of patterns used to organize temporal and cultural experience After an opening essay on transcendental truth and cultural relativism the second chapter traces a distinction common in historical writings during the past two centuries between an alleged ancient classical cyclic view of time and history used to describe the claimed repetitiveness of and similarities between historical events nothing is new under the sun and a contrasting Jewish Christian linear view sometimes described as providential in that it moves through a series of unique events to some end intended by God In the latter history is about something the education of the human race or the redemption of humankind As in each of the remaining essays the book then attempts to draw out the limitations of what the current

consensus on this topic has become It does this for such things as our current understanding of religious toleration humanism natural law and teleology Some of the essays such as those on debate about Augustine s understanding of marriage or the concluding illustrated essay on the baroque city of Lecce are published for the first time Others are based on previously published contributions to the scholarly literature though generally each of these chapters concludes with a postscript that engages with current scholarly debate on the subject

Forbidden Fruit Paul Kurtz, 2010-10-29 Paul Kurtz America s leading secular humanist philosopher affirms that it is possible to live the good life and be morally responsible without belief in religion In this original and penetrating book Kurtz delineates the means by which humanity can transcend the limitations of traditional religious loyalties and achieve a higher stage of ethics Fundamentalists deny the possibility of ethics without belief in God Conservatives rail against secularists Yet belief in God is no guarantee of moral virtue as the evils committed in the name of religion have vividly shown Are there secular ethical principles and values that are vital for a world in crisis In this new edition of *Forbidden Fruit* Kurtz defends the ethics of secularism and humanism In order to progress to a maximum level of creative development he maintains that we must be nourished by the forbidden fruit of the knowledge of good and evil grounding principles and values in autonomous reason This is the path that leads to the discovery of significant ethical truths that can guide both self reliant conduct and consideration for the rights of others By breaking the bonds of theistic illusion we can summon the courage and wisdom to

develop a rational ethic based on a realistic appraisal of nature and an awareness of the centrality of the moral decencies common to all peoples The ultimate key to the good life Kurtz writes is to eat of the fruit of the second tree in the Garden of Eden the tree of life discovering for ourselves the manifold potentialities for a bountiful existence Forbidden Fruit contains important chapters on ethical excellences for individuals moral education for children and thoughts on privacy and human rights in addition to presenting concrete ethical recommendations as alternatives to the reigning orthodoxies Modern Social Theory Dr Derek Layder, Derek Layder, 2005-11-08 This book is intended for undergraduate courses in social theory for second and third year sociology students as well as postgraduate and academic researchers Secondary markets include social psychology social geography social anthropology cultural studies **Ontohackers: Radical Movement Philosophy in the Age of Extinctions and Algorithms, Part II** Jaym*/Jaime del Val, 2025-05-27 Ontohackers redefines what movement worlds and bodies are through the sense of proprioception reconceptualized as formless fluctuation field a movement matrix that is itself also thought and which underlies all life forms and fields including the inorganic Our worlds are made of endless such entangled fields n folding in neverending variation or enferance The current planetary crisis has emerged due to an accidental evolutionary alignment narrowing and impoverishment of that matrix s indeterminacy that appeared gradually and eventually with bipedalism and which created an imbalance between the larger proprioceptive field and its brain and made the atrophied body extend itself technically in geometric fields gradually covering the planet along with its fears with disastrous consequences that are unleashing an unprecedented type of mass extinction and species suicide The reply to this crisis which is urgently due if we are to reduce even slightly the collapse coming up over the next decades is in recovering a lost sensorimotor plasticity which is also cognitive affective and relational plasticity through developing movement technes for cultivating Body Intelligence BI reversing and taking elsewhere the failed evolution culminating in AI stepping down from humanist supremacist pedestals undoing our dependency upon unsustainable killing machines of sedentary consumerism that impoverish experience stopping the reproduction of a species that has become plague by reversing heteronormative reproductive dogmas till we reach preagricultural population levels and recovering the joys of moving with the world in symbiotic mutation towards unprecedented evolutionary variations this is our cosmic responsibility for all life on Earth The book s structure expresses Enferance Theory with regard to how processes of becoming have a triple movement an incipency unfolding the field Part I a condensation expansion where the field acquires full consistency Part II and a resonance or memory of the field relating to other fields Part III Part II subtitled R evolution Technologies includes Books 4 5 and 6 and is by far the longest volume elaborating in depth the book s proposals in a triple movement It first exposes the technologies of variation in nature Book 4 followed by the technologies of reduction in the Algoricene Book 5 and finally the possibilities for overcoming the reductive fold Book 6 Book 4 proposes a swarming chaomology as theory of orgiastic evolution culminating in the concept of metabiosis life as indeterminate symbiotic mutation Book 5 diagnoses the regimes

Humanist Experience Norm R. Allen, 2003 The first book dedicated entirely to humanists of African descent The Black Humanist Experience gives African American humanists the opportunity to discuss their reasons for leaving the religious fold and embracing a humanist life stance As a minority within a minority African American humanists may often feel isolated and misunderstood These thoughtful essays help to draw attention to the vitality of the humanist movement within the black community and they put many myths about humanists to rest Contrary to popular stereotypes most humanists do not reject religion out of disillusionment ignorance desperation or misanthropy The contributors to this volume demonstrate that the decision to adopt the humanist viewpoint is based on intellectual honesty and the best information provided by science history comparative religion and other scholarly disciplines Moreover they show that a central concern of humanists of all races is preservation and promotion of what humanist philosopher Paul Kurtz calls the common moral decencies shared by most religious and ethical systems At a time when faith based organizations are favored politically especially within the black community this timely collection of essays shows that humanism with its emphasis on reason free inquiry moral decency and justice offers much to the challenges facing African Americans **Posthuman Suffering and the Technological**
