same quality of liberating change Practitioners who value deep connection with their clients are richly rewarded by the experiential depth that this core process accesses where no awareness had previously reached whether sessions are done in person or via online video It is an embarrassment of riches because in addition we gain the decisive resolution of several longstanding polarizing debates regarding the nature of symptom production the prevalence of attachment issues the operation of traumatic memory the functions of the client therapist relationship the role of emotional arousal in the process of change and the relative importance of specific versus non specific factors **Innovative Interventions in**
