Epidemics And Mortality In Early Modern Japan Hb:

Epidemics and Mortality in Early Modern Japan Ann Bowman Jannetta, 2014-07-14 Ann Jannetta suggests that Japan's geography and isolation from major world trade routes provided a cordon sanitaire that prevented the worst diseases of the early modern world from penetrating the country before the mid nineteenth century Her argument is based on the medical literature on epidemic diseases on previously unknown evidence in Buddhist temple registers and on rich documentary evidence from contemporary observers in Japan Originally published in 1987 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Doeppers, Peter Xenos, 1998 *Books in Print Supplement*, 1994 *Arts & Humanities Citation Index*, 1992 A multidisciplinary index covering the journal literature of the arts and humanities It fully covers 1 144 of the world's leading arts and humanities journals and it indexes individually selected relevant items from over 6 800 major science and social science journals **The Publishers' Trade List Annual**, 1986

Book Review Index, 1997 Every 3rd issue is a quarterly cumulation New York Journal of Homœopathy, 1907 *The Japan Medical World*, 1925 **Modern Nutrition in Health and Disease** Maurice Edward Shils, Vernon Robert

Young, 1988 New edition of a text that reviews the history scientific base and practice of nutrition for students practitioners and educators One hundred fifteen chapters discuss specific dietary components nutrition in integrated biologic systems dietary and nutritional assessment of the individual prevention and management of disease diet and nutrition in health of populations and adequacy safety and oversight of the food supply The appendix includes dietary reference recommendations anthropometric tables nutrient and nonnutrient contents therapeutic diets and exchange lists and other relevant information Annotation copyrighted by Book News Inc Portland OR **Disease in Populations in Transition** Alan C. Swedlund, George J. Armelagos, 1990-10-24 Societies in transition are often faced with new settings and or new diseases that require a response in order for the affected group to thrive or survive A lack of effective response by a transitional population to a new pathogen can lead to the group's disintegration A stark example of this historically is the decline of Native American civilizations with the arrival of European colonists in the sixteenth and seventeenth centuries The transitional response mechanism has been a neglected topic in anthropology until the publication of this book In a broad selection of nineteen essays by distinguished researchers the epidemiology and health status of prehistoric historical and present day populations in transition are

thoroughly explored Different models biomedical ethnomedical ecological and politicoeconomic are used to illustrate the effects of transition on the health of human populations throughout the world Swedlund and Armelagos have compiled and arranged these essays into three parts genetic and evolutionary perspectives infectious disease and nutrition in temporal perspective and social epidemiology Some of the topics studied in the essays include disease and evolution in Amerindian populations health and disease in prehistoric transitional peoples mortality and morbidity consequences of nutritional variation in early child growth and social support and mortality in post transition populations This insightful book will provide a vital perspective for medical anthropologists development specialists epidemiologists and health professionals as well as for graduate students in related course areas **The Lancet** ,1913 *The Eastern Underwriter* ,1925 **British Medical Journal** ,1898 Current Bibliography of Epidemiology ,1974 Monthly with annual cumulations Comprehensive current index to periodical medical literature intended for use of practitioners investigators and other workers in community medicine who are concerned with the etiology prevention and control of disease Citations are derived from MEDLARS tapes for Index medicus of corresponding date Arrangement by 2 sections i e Selected subject headings and Diseases organisms vaccines No author index Nature Sir Norman Lockyer,1920 **Bibliography of the History of Medicine** ,
