Congdon,Jeffrey R. Kling,Sendhil Mullainathan,2011-04-01 Traditional public finance provides a powerful framework for policy analysis but it relies on a model of human behavior that the new science of behavioral economics increasingly calls into question In *Policy and Choice* economists William Congdon Jeffrey Kling and Sendhil Mullainathan argue that public finance not only can incorporate many lessons of behavioral economics but also can serve as a solid foundation from which to apply insights from psychology to questions of economic policy The authors revisit the core questions of public finance armed with a richer perspective on human behavior They do not merely apply findings from psychology to specific economic problems instead they explore how psychological factors actually reshape core concepts in public finance such as moral hazard deadweight loss and incentives Part one sets the stage for integrating behavioral economics into public finance by interpreting the evidence from psychology and developing a framework for applying it to questions in public finance In part two the authors apply that framework to specific topics in public finance including social insurance externalities and public goods income support and redistribution and taxation In doing so the authors build a unified analytical approach that encompasses both traditional policy levers such as taxes and subsidies and more psychologically informed instruments The net result of this innovative approach is a fully behavioral public finance an integration of psychology and the economics of the public sector that is explicit systematic rigorous and realistic **Technical Translations** ,1966 **Human Reproductive Decisions** R. I. M. Dunbar,1995-04-12 Reproductive biologists evolutionary biologists demographers and social scientists all have a common interest in the business of human reproduction Their perspectives however are very different and have traditionally prevented them from having much to do with each other The conference on which this book is based brought together contributors from each of these disciplines in an attempt to explore the common ground that they share and so generate a better understanding of the factors that influence human fertility **The Science of Gun Policy** RAND Corporation,2018-03-02 This report synthesizes the available scientific evidence on the effects of various firearm policies on firearm deaths violent crime the gun industry participation in hunting and sport shooting and other outcomes Based on this synthesis the authors highlight policies whose effects are better supported by evidence and areas where more and better information could contribute to establishing fair and effective gun policies **Cardiovascular Risk Factors** Armen Yuri Gasparyan,2012-03-14 Cardiovascular risk factors contribute to the development of cardiovascular disease from

early life It is thus crucial to implement preventive strategies addressing the burden of cardiovascular disease as early as possible A multidisciplinary approach to the risk estimation and prevention of vascular events should be adopted at each level of health care starting from the setting of perinatology Recent decades have been marked with major advances in this field with the emergence of a variety of new inflammatory and immune mediated markers of heightened cardiovascular risk in particular The current book reflects some of the emerging concepts in cardiovascular pathophysiology and the shifting paradigm of cardiovascular risk estimation It comprehensively covers primary and secondary preventive measures targeted at different age and gender groups Attention is paid to inflammatory and metabolic markers of vascular damage and to the assessment of vascular function by noninvasive standardized ultrasound techniques This is a must read book for all health professionals and researchers tackling the issue of cardiovascular burden at individual and community level It can also serve as a didactic source for postgraduate medical students
