**Epipaleolithic Subsistence Strategies in the Levant** Guy Bar-Oz, 2021-08-04 Knowledge of the Levantine Epipaleolithic period plays a critical role in understanding the transition from nomadic hunter gatherer foraging groups to sedentary communities on the threshold of agriculture In this study Bar Oz has clarified many aspects of the relationship between Epipaleolithic foragers and their prey The Epipaleolithic foragers all utilized similar hunting methods as evidenced by culling patterns they used for gazelle and fallow deer Multivariate inter site zooarchaeological and taphonomic research from a single geographical area and ecological setting the coastal plain of Israel provides important records of the Epipaleolithic cultural sequence A wide variety of data highlights uniform patterns of cultural and economic behaviors related to food procurement and processing strategies and demonstrates cultural continuity in subsistence strategies within the Levantine Epipaleolithic sequence *Natufian Foragers in the Levant* Ofer Bar-Yosef, François R. Valla, 2013-12-01 This large volume presents virtually all aspects of the Epipalaeolithic Natufian culture in a series of chapters that cover recent results of field work analyses of materials and sites and synthetic or interpretive overviews of various aspects of this important prehistoric culture *Unearthing Jerusalem* Katharina Galor, Gideon Avni, 2011-06-30 On a cold winter morning in January of 1851 a small group of people approached the monumental facade of an ancient rock cut burial cave located north of the Old City of Jerusalem The team consisting of two Europeans and a number of local workers was led by Louis Flicien Caignart de Saulcy descendant of a noble Flemish family who later was to become a distinguished member of the French parliament As an amateur archaeologist and a devout Catholic de Saulcy was attracted to the Holy Land and Jerusalem in particular and was obsessed by his desire to uncover some tangible evidence for the city's glorious past However unlike numerous other European pilgrims researchers and adventurers before him de Saulcy was determined to expose the evidence by physically excavating ancient sites His first object of investigation constitutes one of the most attractive and mysterious monumental burial caves within the vicinity of the Old City from then onward to be referred to as the Tomb of the Kings Kubur al Muluk By conducting an archaeological investigation de Saulcy tried to prove that this complex represented no less than the monumental sepulcher of the biblical Davidic Dynasty His brief exploration of the burial complex in 1851 led to the discovery of several ancient artifacts including sizeable marble fragments of one or several sarcophagi It would take him another 13 years to raise the funds for a more comprehensive investigation of the site On November 17 1863 de Saulcy returned to Jerusalem with a larger team to initiate what would later be referred to as the first archaeological excavation to be conducted in the city from the Preface In 2006 some two dozen contemporary archaeologists and historians met at Brown University in Providence RI to present papers and illustrations marking the 150th anniversary of modern archaeological exploration of the Holy City The papers from that conference are published here presented in 5 major sections 1 The History of Research 2 From Early Humans to the Iron Age 3 The Roman Period 4 The Byzantine Period and 5 The Early Islamic and

Medieval Periods The volume is heavily illustrated with materials from historical archives as well as from contemporary excavations It provides a helpful and informative introduction to the history of the various national and religious organizations that have sponsored excavations in the Holy Land and Jerusalem in particular as well as a summary of the current status of excavations in Jerusalem **Zooarchaeology and Modern Human Origins** Jamie L. Clark, John D.

Speth, 2013-07-11 Recent genetic data showing that Neanderthals interbred with modern humans have made it clear that deeper insight into the behavioral differences between these populations will be critical to understanding the rapid spread of modern humans and the demise of the Neanderthals This volume which brings together scholars who have worked with faunal assemblages from Europe the Near East and Africa makes an important contribution to our broader understanding of Neanderthal extinction and modern human origins through its focus on variability in human hunting behavior between 70 25 000 years ago a critical period in the later evolution of our species Food Energy Water: The Foundation Systems of

Modern Society Arthur Jackson, 2012-10-06 Why does our society or any society function as it does Many of the activities were established by social systems created in the past and are currently being maintained by the larger society Other organized patterns of behavior seemed to have occurred spontaneously without any specific organizing effort but continue to control and govern behavior for very long periods of time Why are certain animals used for domestic stock and not others Why is the method of farming in China and India so different from farming in America and Europe Why are there so many more people in Asia and India than in the rest of the world Was there some guiding principle that determined which patterns of behavior would dominate To understand these process one must first understand the layers of systems controlling our world **Deer of the World** Mario Melletti, Stefano Focardi, 2025-06-11 This book is the first comprehensive reference

work ever published on the systematics ecology conservation status and management of all the world s deer species Covering all 53 deer species worldwide this volume brings together the contributions of 160 international deer experts and provides A comprehensive overview of the current state of knowledge on the evolution phylogeny taxonomy and systematics of deer An in depth insight into the ecology and conservation status of each species with detailed accounts A series of case studies on conservation management hunting farming disease ecology and the impact of deer on forest ecosystems This beautifully illustrated book is an invaluable resource for researchers wildlife managers and students of conservation biology ecology and management as well as the interested layperson It reveals the fascinating story of deer evolution the long history of human interactions with deer and the major threats to this charismatic species group **The Oxford Handbook of the**

**Archaeology and Anthropology of Hunter-Gatherers** Vicki Cummings, Peter Jordan, Marek Zvelebil, 2014-04-24 For more than a century the study of hunting and gathering societies has been central to the development of both archaeology and anthropology as academic disciplines and has also generated widespread public interest and debate The Oxford Handbook of the Archaeology and Anthropology of Hunter Gatherers provides a comprehensive review of hunter gatherer studies to date

including critical engagements with older debates new theoretical perspectives and renewed obligations for greater engagement between researchers and indigenous communities Chapters provide in depth archaeological historical and anthropological case studies and examine far reaching questions about human social relations attitudes to technology ecology and management of resources and the environment as well as issues of diet health and gender relations all central topics in hunter gatherer research but also themes that have great relevance for modern global society and its future challenges The Handbook also provides a strategic vision for how the integration of new methods approaches and study regions can ensure that future research into the archaeology and anthropology of hunter gatherers will continue to deliver penetrating insights into the factors that underlie all human diversity

**The Evolution of Hominin Diets** Jean-Jacques Hublin, Michael P. **Bones and Identity** Nimrod Marom, Reuven Yeshuran, Lior Weissbrod, Guy Bar-Oz, 2016-07-31 Seventeen papers demonstrate how zooarchaeologists engage with questions of identity through culinary references livestock husbandry practices and land use Contributions combine hitherto unpublished zooarchaeological data from regions straddling a wide geographic expanse between Greece in the West and India in the East and spanning a time range from the latest part of the Palaeolithic to the Middle Ages The vitality of a hands on approach to data presentation and interpretation carried out primarily at the level of the individual site the arena of research providing the bread and butter of zooarchaeological work conducted in southwest Asia is demonstrated Among the themes explored are shifting identities of late hunter gatherers through interactions with settled agrarian societies the management of camp sites by early complex hunter gatherers processes of assimilation of Roman culinary practices among Egyptian elites and the propagation of

medieval pilgrim identity through the use of seashell insignia A wealth of new data is discussed and a wide variety of applications of analytical approaches are applied to particular case studies within the framework of social and contextual zooarchaeology The volume constitutes the proceedings of the 11th meeting of the ICAZ Working Group Archaeozoology of Southwestern Asia and Adjacent Areas ASWA

**On Human Nature** Michel Tibayrenc, Francisco J. Ayala, 2016-09-12 On Human Nature Biology Psychology Ethics Politics and Religion covers the present state of knowledge on human diversity and its adaptative significance through a broad and eclectic selection of representative chapters This transdisciplinary work brings together specialists from various fields who rarely interact including geneticists evolutionists physicians ethologists psychoanalysts anthropologists sociologists theologians historians linguists and philosophers Genomic diversity is covered in several chapters dealing with biology including the differences in men and apes and the genetic diversity of mankind Top specialists known for their open mind and broad knowledge have been carefully selected to cover each topic The book is therefore at the crossroads between biology and human sciences going beyond classical science in the Popperian sense The book is accessible not only to specialists but also to students professors and the educated public Glossaries of specialized terms and general public references help nonspecialists understand complex notions with contributions avoiding technical jargon Provides greater understanding of diversity and population structure and history with crucial foundational knowledge needed to conduct research in a variety of fields such as genetics and disease Includes three robust sections on biological psychological and ethical aspects with cross fertilization and reciprocal references between the three sections Contains contributions by leading experts in their respective fields working under the guidance of internationally recognized and highly respected editors

**Radiocarbon Dating** R.E. Taylor, Ofer Bar-Yosef, 2016-06-03 This volume is a major revision and expansion of Taylor s seminal book Radiocarbon Dating An Archaeological Perspective It covers the major advances and accomplishments of the 14C method in archaeology and analyzes factors that affect the accuracy and precision of 14C based age estimates In addition to reviewing the basic principles of the method it examines 14C dating anomalies and means to resolve them and considers the critical application of 14C data as a dating isotope with special emphasis on issues in Old and New World archaeology and late Quaternary paleoanthropology This volume again a benchmark for 14C dating critically reflects on the method and data that underpins in so many cases the validity of the chronologies used to understand the prehistoric archaeological record

**Voices in American Archaeology** Wendy Ashmore, Dorothy T. Lippert, Barbara J. Mills, 2010-05-01 Archaeological ideas and practices have experienced transformative change since the Society for American Archaeology s fiftieth Anniversary Authors in this volume from the SAA press consider critically some of today s most noteworthy issues Their voices like their views are as diverse as the discipline Nonetheless they repeatedly recognize deep articulation between archaeology and social economic and political milieus from local to global scales And they share conviction that much is to be done in the years ahead This volume aims to rouse more voices to join the lively ongoing

 book examines social change in Cyprus during the 6th to 4th millennia BC a period that is traditionally viewed as one of  
 prolonged cultural continuity and isolation from the mainland Through the documentation and integration of technological  
 practice and up to date climatic ecological and environmental data it is proposed that many of the observable differences  
 between mainland southwest Asia and Cyprus during this period are the result of divergent adaptive strategies in response to  
 different environmental conditions low population density and low resource stress The book draws upon theories in  
 ecological and evolutionary biology and adapts it to cultural change in general By employing a holistic approach with a focus  
 on technological practice the book seeks to show that cultural change on Cyprus is concomitant with broadly similar cultural  
 trajectories taken in other regions on the margins of southwest Asia The conclusion reached is that if all of the pressures that  
 drove cultural change on the mainland were relaxed the result would be a stable hunter gatherer economy with a bit of  
 farming and herding exactly what appears to be the case on Cyprus      International Bibliography of Book Reviews of
