Epistemology Internalism And Externalism:

Internalism and Externalism in Semantics and Epistemology Sanford Goldberg, 2007-10-11 To what extent are meaning on the one hand and knowledge on the other determined by aspects of the outside world Internalism and Externalism in Semantics and Epistemology presents twelve specially written essays exploring these debates in metaphysics and epistemology and the connections between them In so doing it examines how issues connected with the nature of mind and language bear on issues about the nature of knowledge and justification and vice versa Topics discussed include the compatibility of semantic externalism and epistemic internalism the variety of internalist and externalist positions both semantic and epistemic semantic externalism s implications for the epistemology of reasoning and reflection and the possibility of arguments from the theory of mental content to the theory of epistemic justification and vice versa

Epistemology Hilary Kornblith, 2001-10-08 This anthology brings together ten papers which have defined and advanced the debate between internalism and externalism in epistemology Internalist approach to knowledge and justification Difrine Madara, 2020-07-30 Academic Paper from the year 2019 in the subject Law Philosophy History and Sociology of Law grade A language English abstract This paper discusses various aspects of internalist approach to knowledge and justification Furthermore the paper acknowledges that internalism has both strengths and weaknesses in relation to understanding various aspects of epistemology Internalism externalism discussions are central elements in the field of contemporary epistemology These debates aim to answer the fundamental questions on the basic nature of epistemic justification and knowledge Basically internalism encompasses justification which is a result of internal factors to a person On the other hand externalists claim that justification should also be determined by factors which are external to the debate Determining what is internal to the person has thus become central aspect of the internalism externalism debate **Verbal**

Disputes and the Internalism/externalism Debate in Epistemology John M. Fraiser, 2010 It is common to find philosophers attempting to resolve long standing philosophical debates by regarding them as verbal disputes Looking at those debates which are commonly regarded as verbal disputes we can detect two kinds of verbal disputes STDC cases in which disputing parties apply the Same Term or phrase to Different Concepts DTSC cases in which disputing parties apply Different Terms or phrases to the Same Concept While cases of STDC or DTSC may be verbal disputes I will argue that STDC and DTSC are neither necessary nor sufficient conditions for a verbal dispute I will explore the identity of a verbal dispute the conditions for its occurrence and methods for detecting it I develop a condition for verbal disputes which I call the Principle of Equal Power PEP For any dispute to be a verbal dispute requires that the linguistic frameworks of the disputing parties have equal powers to express the parties undisputed beliefs albeit expressed in different ways This condition is similar to the conditions developed by numerous verbal dispute theorists In most cases we will not be able to analytically detect that PEP is satisfied I argue that the best method for detecting when PEP is satisfied is an empirical method which

attempts to test a sufficient number of relevant conceptual scenarios to assess whether the linguistic frameworks of each side have equal powers to express the same beliefs Only then can we conclude that we most likely have a verbal dispute I will take up the internalism vs externalism debate in epistemology and address compatibilist arguments which treat the debate as a verbal dispute While there are a variety of brands of internalism and externalism internalism may be defined broadly as the claim that some state internal to the agent is necessary and or sufficient in order for that agent to be justified or for the agent to have knowledge Externalism is the denial of this thesis Broadly externalism is the claim that external conditions are necessary and or sufficient for an agent to be justified or for the agent to have knowledge Even though the internalism externalism debate fits the STDC paradigm this does not prove that it is a verbal dispute In this thesis I will argue that in the history of the internalism externalism debate we have seen the empirical method at work through the use of test cases even though epistemologists may not have been very self aware of the methodology The fact that the test cases offered by both internalists and externalists have had persuasive power in the debate between them is strong indication that they share significant overlap in their epistemological beliefs Thus we can employ an empirical method to determine which view has greater powers to express these shared beliefs Though there are ways in which particular internalist externalist debates could be compatible there are also incompatible ones Thus we cannot say that internalism and externalism in epistemology are wholly compatible Among the debates which seem incompatible we will have to decide which view is correct by assessing which side has greater powers to express the undisputed beliefs In the meantime we have no good reason to think that the internalism externalism debate is on the whole a verbal dispute

Justification Without Awareness Michael Bergmann, 2006-05-18 Virtually all philosophers agree that for a belief to be epistemically justified it must satisfy certain conditions Perhaps it must be supported by evidence Or perhaps it must be reliably formed Or perhaps there are some other good making features it must have But does a belief's justification also require some sort of awareness of its good making features The answer to this question has been hotly contested in contemporary epistemology creating a deep divide among its practitioners Internalists insist that such awareness is required for justification whereas externalists insist that it isn't The first part of Michael Bergmann's book argues that internalism faces an inescapable dilemma either it leads to vicious regress problems and ultimately radical skepticism or it is entirely unmotivated The second part of the book begins by developing the author's own externalist theory of justification one imposing both a proper function and a no defeater requirement Bergmann concludes by demonstrating the failure of two prominent critiques of externalism namely that it is infected with epistemic circularity and that it cannot respond adequately to skepticism Together the two parts of the book provide a decisive

refutation of internalism and a sustained defense of externalism Moreover they do so while placing a high priority on making the author s opponents feel that their positions and objections are understood

Metaepistemology and Skepticism Richard A. Fumerton, 1995-11-21 In this excellent treatment of the internalism externalism debate in contemporary epistemology Richard Fumerton explores its implications for traditional skeptical concerns When one fully understands these implications Fumerton argues one will see philosophical usefulness of a foundationalism relying on acquaintance Contending that the externalist response to skepticism is too quick and easy Fumerton defends a version of internalism but in doing so puts into stark relief the radically different alternatives for dealing with skepticism that our metaepistemological views force upon us

Faith, Reason, and Culture George Karuvelil, 2020-07-24 In this book George Karuvelil seeks to establish the rationality of religion and theology in the contemporary world Theology has always required some philosophical basis Moreover Christian theology has had a dynamic character that enabled it to adapt to more than one philosophy depending on the need of the time For instance it shifted in accordance with the change from Neo Platonism to Aristotelianism in the thirteen century However this dynamism has been absent since the dawn of modernity when reason became identified with modern science to disastrous results While the advent of postmodernism has brought the limits of modernism to light it has done nothing to establish the rationality of religion other than to treat religion as a cultural phenomenon along with science This book conceives fundamental theology as a discipline that seeks religious truth in the midst of diverse perspectives ranging from militant atheism to violent religious fanaticism
