A Brain's Battle Against a Stroke Robert Sussler, 2007-05-15 A stroke because it is the blocking of blood flow to tissues within the brain can be life threatening, leave permanent damage or require the patient to do a daily battle with his own brain. The recovery of the stroke patient requires the specialist to treat to understand and to involve the whole patient and not just the physical damage and the cause. Today, medicine concentrates on the physical damage and the cause as determined by the technology and the corrective treatment within each specialty. Specialists lack the time to make patients part of the curing. My recovery from a stroke illustrates that the recovery was inadvertently set back and impeded. The failure to recognize my lack of knowledge about my medical problem and to devote the time necessary to make me fully understand the stroke damage left me feeling like medical garbage. Until a specialist took the time to explain the brain damage and its affect in language that I understood, I was my own worst enemy on the road to recovery. An early period of medicine fifty years ago with more limited scientific knowledge, lacking technology and pharmaceuticals, had to focus on the whole patient to motivate their recuperative natural will to recover. They understood the disease or injury but often knew the recovery was more dependent on the patient than the scientific advancements that did not exist. This book is the clinical history of the author, a stroke victim. The book, by recounting his experiences on the road to partial recovery, adds a unique additional insight into the author's knowledge of medicine practiced by his dad fifty years earlier.

The Absolute and Star Trek George A. Gonzalez, 2016-12-23 This volume explains how Star Trek allows viewers to comprehend significant aspects of Georg Hegel's concept of the absolute, the driving force behind history. Gonzalez with wit and wisdom explains how Star Trek exhibits central elements of the absolute. He describes how themes and ethos central to the show display the concept beautifully. For instance, the show posits that people must possess the correct attitudes in order to bring about an ideal society: a commitment to social justice, an unyielding commitment to the truth, and a similar commitment to scientific intellectual discovery. These characteristics serve as perfect embodiments of Hegel's conceptualization, and Gonzalez's analysis is sharp and exacting.

Ma Vie en Noir Daniel Pedro Cardinali, 2016-09-12 I wrote this book urged by the overwhelming desire that arises towards the end of life to recapitulate the past My goal was to summarize my experience of practicing science at the end of the 20th and early 21st centuries in Argentina a country located far away from the world's leading scientific centers In the book I summarize the intricacies of the pineal gland the stone of madness as historical mystical and medical entity and its entry in contemporary medicine with the description of melatonin I also reflect on how being associated with an unexplored subject at the beginning of his scientific career impacts the life of a scientist throughout their entire life Today we know that in humans pineal melatonin is released every day late in the evening and there is evidence that it is the trigger for the sleep process But

the most exciting aspect of melatonin is that it is a substance that is present in all living creatures from unicellular organisms to plants and higher mammals a fact that evinces its importance for life Further the neuroprotective action of melatonin promises to be crucial for the control of neurodegenerative diseases we face as a pandemic in this century The discoverer of melatonin Aaron Lerner based its name on melano the Greek word for black because of its effect on the pigment cells of the skin As in La vie en rose the immortal Edith Piaf song written in 1946 my lifelong work with melatonin could well be called Ma vie en noir
