Ernst Cassirer S. G. Lofts, 2000-03-09 Provides a reading of Cassirer's philosophy of symbolic forms in the context of contemporary continental philosophy **Symbolic Forms and Cultural Studies** Cyrus Hamlin, John Michael Krois, 2004-01-01 Cassirer's conception of culture theory of symbolism anticipated much of later cultural theory. The essays in this volume explore aspects of his thinking demonstrate the influence that it had on later scholarship

Writing the History of the Mind Cristina Chimisso, 2016-02-11 For much of the twentieth century French intellectual life was dominated by theoreticians and historians of mentalit. Traditionally the study of the mind and of its limits and capabilities was the domain of philosophy however in the first decades of the twentieth century practitioners of the emergent human and social sciences were increasingly competing with philosophers in this field ethnologists sociologists psychologists and historians of science were all claiming to study how people think. Scholars including Gaston Bachelard Georges Canguilhem Léon Brunschvicg Lucien Lévy-Bruhl Lucien Febvre Abel Rey Alexandre Koyré and Hélène Metzger were all investigating the mind historically and participating in shared research projects. Yet as they have since been appropriated by the different disciplines literature on their findings has so far failed to recognise the connections between their research and their importance in intellectual history. In this exemplary book Cristina Chimisso reconstructs the world of these intellectuals and the key debates in the philosophy of mind particularly between those who studied specific mentalities by employing prevalently historical and philological methods and those who thought it possible to write a history of the mind outlining the evolution of ways of thinking that had produced the modern mentality. Dr Chimisso situates the key French scholars in their historical context and shows how their ideas and agendas were indissolubly linked with their social and institutional positions such as their political and religious allegiances their status in academia and their familial situation. The author employs a vast range of original research using philosophical and scientific texts as well as archive documents correspondence and seminar minutes from the period covered to recreate the milieu in which these relatively neglected scholars made advances in the history of philosophy and science and produced

Psychiatry as a Human Science Antoine Mooy, 2012 Preliminary Material The Medical Discourse The Exclusion of Psychic Reality The History of Hermeneutical Psychiatry The Relationship between the Psychic and Physical Reality Empiricism in Psychiatry Three Forms of Hermeneutics Psychic Reality and the Symbolic Function in Triplicate Three Psychopathological Structures and Nine Subject Positions The Interpretation of a Life History Epilogue Table Outlining Psychopathological Structures Bibliography Name Index Subject Index **Moments of Negotiation** Jürgen Pieters, 2001 Moments of Negotiation offers the first book length and indepth analysis of the New Historicist reading method which the American Shakespeare scholar Stephen Greenblatt introduced at the beginning of the 1980s. Ever since Greenblatt has been hailed as the prime representative of this movement whose critical acclaim has been one of the dominant trends in recent literary and cultural studies. In this new book Jürgen Pieters attempts to fill a remarkable lacuna in

the critical reception of Greenblatt's work. The book's aim is to provide a thorough analysis of the theoretical background of Greenblatt's method. This involves not only a close reading of Greenblatt's sources, the book offers introductory surveys of the work of Mikhail Bakhtin, Michel Foucault, Louis Althusser, Pierre Macherey, Michel de Certeau, Jean François Lyotard, Raymond Williams, and Stuart Hall, but also a critique of the way in which he adapts and transforms their original insights in the framework of his own interdisciplinary method. This book is of interest to students and scholars coming from a diverse range of fields: literary theory, cultural history, early modern studies, Shakespeare studies, theory and practice of history.

Let There Be Enlightenment Anton M. Matytsin, Dan Edelstein, 2018-09-14 Challenging the triumphalist narrative of Enlightenment secularism. According to most scholars, the Enlightenment was a rational awakening, a radical break from a past dominated by religion and superstition. But in Let There Be Enlightenment, Anton M. Matytsin and Dan Edelstein and the contributors they have assembled deftly undermine this simplistic narrative. Emphasizing the ways in which religious beliefs and motivations shaped philosophical perspectives, essays in this book highlight figures and topics often overlooked in standard genealogies of the Enlightenment. The volume underscores the prominent role that religious discourses continued to play in major aspects of seventeenth and eighteenth century thought. The essays probe a wide range of subjects from reformer Jan Amos Comenius's quest for universal enlightenment to the changing meanings of the light metaphor, Quaker influences on Baruch Spinoza's theology, and the unexpected persistence of Aristotle in the Enlightenment. Exploring the emergence of historical consciousness among Enlightenment thinkers while examining their repeated insistence on living in an enlightened age, the collection also investigates the origins and the long term dynamics of the relationship between faith and reason. Providing an overview of the rich spectrum of eighteenth century culture, the authors demonstrate that religion was central to Enlightenment thought. The term enlightenment itself had a deeply religious connotation. Rather than revisiting the celebrated breaks between the eighteenth century and the period that preceded it, Let There Be Enlightenment reveals the unacknowledged continuities that connect the Enlightenment to its various antecedents. Contributors: Philippe Buc, William J. Bulman, Jeffrey D. Burson, Charly Coleman, Dan Edelstein, Matthew T. Gaetano, Howard Hotson, Anton M. Matytsin, Darrin M. McMahon, James Schmidt, Cline Spector, Jo Van Cauter.

Nature et humanité Etienne Bimbenet, 2004 L'anthropologie de Merleau-Ponty place la question de l'humanité en direction d'un questionnement de type ontologique ayant vocation à finir les catégories de l'expérience et d'une philosophie de la nature qui seule peut rendre compte du phénomène humain.

The Habermas-Luhmann Debate Gorm Harste,2021-10-29 Fifty years ago the two leading German philosophers and sociologists since the Second World War J rgan Habermas and Niklas Luhmann embarked on a sweeping and contentious debate that would continue for decades Their coauthored 1971 book Theory of Society or Social Technology laid out their opposing positions on meaning communication consensus and dissent and ultimately the foundations of modern social thought Habermas and Luhmann would elaborate their disagreement in the years to come in a controversy whose aftershocks divided social theorists by presenting what appeared to be two fundamentally divergent views of the nature of society and what systems theory was capable of explaining This is the first book in English about one of the most important conflicts in social theory today Gorm Harste analyzes the Habermas Luhmann debate from its inception through Habermas s most recent works exploring issues such as methodology ideology truth history and politics He contextualizes their positions in terms of how each grappled with the legacy of Nazism and sought to provide grounding for an antitotalitarian politics Harste follows the evolution of the debate as the fundamental dispute over the normative and practical desirability of agreement and disagreement came to touch upon political questions including the rule of law the separation of powers human rights individualization and secularization Ultimately Harste emphasizes the convergence between Habermas and Luhmann and the pressing need for social theorists to further unite these two formative accounts of contemporary society

Christina of Sweden and her Circle Susanna Åkerman, 1991-07-01 The life and works of Queen Christina of Sweden 1626
1689 have often been obscured behind a haze of lurid myths and legends This book looks again at her notorious abdication of
1654 seeing it against the background of her reputation as a libertine a heterodox religious thinker Her subsequent
conversion to Catholicism is therefore understood as a consequence of messianic and millenarian expectations during those
turbulent years and her bizarre attempt in 1657 to become the ruler of Naples is revealed to be the political wing of a
comprehensive religious and intellectual philosophy
