Controlling Contested Places Christine Shepardson, 2019-05-14 From constructing new buildings to describing rival controlled areas as morally and physically dangerous leaders in late antiquity fundamentally shaped their physical environment and thus the events that unfolded within it Controlling Contested Places maps the city of Antioch Antakya Turkey through the topographically

sensitive vocabulary of cultural geography demonstrating the critical role played by physical and rhetorical spatial contests during the tumultuous fourth century. Paying close attention to the manipulation of physical places, Christine Shepardson exposes some of the powerful forces that structured the development of religious orthodoxy and orthopraxy in the late Roman Empire. Theological claims and political support were not the only significant factors in determining which Christian communities gained authority around the Empire. Rather, Antioch's urban and rural places far from being an inert backdrop against which events transpired, were ever-shifting sites of and tools for the negotiation of power, authority, and religious identity. This book traces the ways in which leaders like John Chrysostom, Theodoret, and Libanius encouraged their audiences to modify their daily behaviors and transform their interpretation of the world and landscape around them. Shepardson argues that examples from Antioch were echoed around the Mediterranean world, and similar types of physical and rhetorical manipulations continue to shape the politics of identity and perceptions of religious orthodoxy to this day. *Revitalizing*

Health Through Humanities: Foregrounding Unheard Trends L. Santhosh Kumar, Barnashree Khasnobis, Sreedevi Santhosh, 2024-11-28. Health Humanities in contemporary times has enabled exploration of the unexplored chartered terrains in literary paradigms. Scholars in the field of Humanities and Sciences have been engaging with the praxis of applying concepts from both disciplines, revising the approach towards Health Care and Humanities. Due to interdisciplinary and multidisciplinary methodologies of reading literary texts, they have been reinforcing a paradigm shift from the conventional understanding of narratives in Literature and Health Care. Traditional discursive boundaries between the disciplines of Health and Humanities are collapsing due to a comprehensive and nuanced interpretation of the shared ontological foundation between the two. Humanism terminologies like Displacement, Dislocation, and Disjunction unite Health and Humanities, and they also make the unknown known. Health Humanities explores the different multitudes of narration in the literary arena and it represents diverse voices of literature. It also showcases the importance of re-reading a text owing to its autotelic status. The authors who have contributed chapters for this book have meticulously selected diverse texts and contexts embedded in the dynamism of Health Humanities. This book is an impetus for academicians from the field of Humanities and Sciences who desire to venture into new epistemes towards Health Humanities. *The Mara Contact* H. M. Porteous, 2019-01-17.
