Healing By Hand Manual Medicine And Bonesetting In Global Perspective:

Healing by Hand Servando Z. Hinojosa, 2004 *Healing by Hand* presents the first cross cultural perspective on manual medicine studies the practice of body therapists that is routinely overlooked by medical practitioners and social scientists The authors describe how manual medicine is one of the primary providers of traditional medicine It takes numerous forms across the world s communities and represents beliefs and practices about healing physical and psychological states and the relation between culture and health This volume is a valuable resource for manual practitioners of western medicine including massage therapists physical therapists chiropractors and osteopaths as well as those with traditional training It is especially recommended for courses such as medical anthropology health and human culture technology and the developing world sociology of health international health and health care systems *Lethal Spots, Vital Secrets* Roman Sieler, 2015 *Lethal Spots Vital Secrets* provides an ethnographic study of varmakalai or the art of the vital spots a South Indian esoteric tradition that combines medical practice and martial arts Although siddha medicine is officially part of the Indian Government s medically pluralistic health care system very little of a reliable nature has been written about it Drawing on a diverse array of materials including Tamil manuscripts interviews with practitioners and his own personal experience as an apprentice Sieler traces the practices of varmakalai both in different religious traditions such as Yoga and Ayurveda and within various combat practices His argument is based on in depth ethnographic research in the southernmost region of India where hereditary medico martial practitioners learn their occupation from relatives or skilled gurus through an esoteric spiritual education system Rituals of secrecy and apprenticeship in varmakalai are among the important focal points of Sieler s study Practitioners protect their esoteric knowledge but they also engage in a kind of lure and withdrawal a performance of secrecy because secrecy functions as what might be called symbolic capital Sieler argues that varmakalai is above all a matter of texts in practice knowledge transmission between teacher and student conveys tacit non verbal knowledge and constitutes a moral economy It is not merely plain facts that are communicated but also moral obligations ethical conduct and tacit bodily knowledge *Lethal Spots Vital Secrets* is an insightful analysis of practices rarely discussed in scholarly circles It will be a valuable resource to students of religion medical anthropologists historians of medicine Indologists and martial arts and performance studies *The Back Door to Medicine* Anderson M. D. Robert Anderson M. D., 2009-10 An anthropologist typically does research by immersing oneself in a society learning the language if need be spending a year or two observing asking questions getting involved photographing videotaping and writing copious notes on how people live their lives in other words on how they experience and manifest their culture Anthropologists call that method participant observation and the goal is to produce a cultural description that can be shared with any and all who might be interested This book describes three cultures in a single integrated narrative For one it offers a case study of the culture of anthropology itself as it records how I experienced ethnographic research as both a method and a way of life My original goal

was to describe the culture of chiropractic as a prominent and important field of alternative medicine As is common in anthropology that seemingly straight forward objective detoured in an unanticipated direction I accomplished my purpose by graduating from a chiropractic college as a Doctor of Chiropractic D C Still another unanticipated diversion in this complex ethnographic adventure led to medical school but not in an accredited institution in the United States Taking a leave of absence from my professorship at Mills College I eventually graduated from a Mexican medical school as a Doctor of Medicine M D I earned qualifications in medicine and surgery by entering the profession through a back door *Health Care in Maya Guatemala* John Palmer Hawkins,2007 This book examines medical systems and institutions in three K'iche' Maya communities to reveal the conflicts between indigenous medical care and the Guatemalan biomedical system It shows the necessity of cultural understanding if poor people are to have access to medicine that combines the best of both local tradition and international biomedicine

The Lost origins of Osteopathy and Chiropractic in European Mechanical Medicine and Physical Education, c. 1800-1950 Anders Ottosson,2025-07-31 This book examines the global history of allegedly scientific mechanical cures commonly used to combat internal and chronic diseases and explores how and why the professional demarcation between orthodox and irregular medicine evolved Now globally dispersed the systems of osteopathy and chiropractic are considered as unique pieces of therapeutic Americana with no obvious inspirational counterpart found in the Old World It is their similar monocausal and biomedically strange etiologies that have given them this status namely that dislocations and subluxations of joints in the spine were the main source of disease At the end of the 19th century when osteopathy and chiropractic materialized in the USA this was a spectacular claim Notably the Germ theory had its breakthrough yet early osteopaths and chiropractors did not recognize it in favor of their dislocations and subluxations This book presents a new answer regarding what formed their etiologies Through a combination of many unutilized source materials with novel theoretical and methodical approaches the systems of osteopathy and chiropractic are traced back and related to a seminal yet overlooked 19th century European discourse of so called mechanical medicine which also permeated the USA Shedding new light on the professionalization and gendering of the modern healthcare system this volume will be of value to students and scholars alike interested in the history of science technology and medicine

Maya Bonesetters Servando Z. Hinojosa,2020-02-28 Scholarship on Maya healing traditions has focused primarily on the roles of midwives shamans herbalists and diviners Bonesetters on the other hand have been largely excluded from conversations about traditional health practitioners and community health resources Maya Bonesetters is the first book length study of bonesetting in Guatemala and situates the manual healing tradition within the current cultural context one in which a changing medical landscape potentially threatens bonesetters work yet presents an opportunity to strengthen its relevance Drawing on extensive field research in highland Guatemala Servando Z Hinojosa introduces readers to a seldom documented though nonetheless widespread variety of healer This book examines the work of Kaqchikel and Tz'utujil Maya bonesetters

analyzes how they diagnose and treat injuries and contrasts the empirical and sacred approaches of various healers Hinojosa shows how bonesetters are carefully adapting certain biomedical technologies to meet local expectations for care and concludes that despite pressures and criticisms from the biomedical community bonesetting remains culturally meaningful and vital to Maya people even if its future remains uncertain Palaeopathology and Evolutionary Medicine Kimberly A. Plomp, Charlotte A. Roberts, Sarah Elton, Gilian R. Bentley, 2022-07-14 Evolutionary medicine has been steadily gaining recognition not only in modern clinical research and practice but also in bioarchaeology the study of archaeological human remains and especially its sub discipline palaeopathology To date however palaeopathology has not been necessarily recognised as particularly useful to the field and most key texts in evolutionary medicine have tended to overlook it This novel text is the first to highlight the benefits of using palaeopathological research to answer questions about the evolution of disease and its application to current health problems as well as the benefits of using evolutionary thinking in medicine to help interpret historical disease processes It presents hypothesis driven research by experts in biological anthropology including palaeopathology medicine health sciences and evolutionary medicine through a series of unique case studies that address specific research questions Each chapter has been co authored by two or more researchers with different disciplinary perspectives in order to provide original insightful and interdisciplinary contributions that will provide new insights for both palaeopathology and evolutionary medicine Palaeopathology and Evolutionary Medicine is intended for graduate level students and professional researchers in a wide range of fields including the humanities history social sciences anthropology archaeology palaeopathology geography and life sciences medicine and biology Relevant courses include evolutionary medicine evolutionary anthropology medical anthropology and palaeopathology A History of Australia's Early Cosmopolitan Naturopathic Osteopathy Shirley Murray Strachan, 2025-05-30 Revealing the forgotten ideas and philosophy behind early naturopathic osteopathy Shirley Murray Strachan presents a reoriented historical view of Thomas Ambrose Bowen and his work breaking from the prevailing twentieth century legitimization narrative of mainstream chiropractic and osteopathy and exploring the contributions and practices of Australia's early cosmopolitan naturopathic osteopathy pioneers FG Roberts and Maurice Blackmore Viewing Bowen's practice and symbolism through a historical lens the book examines the forgotten world of early cosmopolitan Australian osteopathy debunking popular posthumous commercialised claims about Bowen's work and asserts the importance of traditional approaches in naturopathic osteopathy Though an interrogation of conflicting origin stories and myths about Bowen's work it highlights the important contributions of naturopathic pioneers FG Roberts and Maurice Blackmore The background narrative is the struggle of mainstream chiropractic and osteopathy seeking professional recognition and forged from in fighting between overseas and Australian chiropractic and osteopathic political interests Counterposed is the posthumous popular interpretations that orphaned Bowen's work from its wellsprings in naturopathic osteopathy This is an accessible book for historians and practitioners of

early osteopathy chiropractic and naturopathy especially to the large international community of accredited Bowen therapists

The Religion of Chiropractic Holly Folk, 2017-03-13 Chiropractic is by far the most common form of alternative medicine in the United States today but its fascinating origins stretch back to the battles between science and religion in the nineteenth century At the center of the story are chiropractic's colorful founders D D Palmer and his son B J Palmer of Davenport Iowa where in 1897 they established the Palmer College of Chiropractic Holly Folk shows how the Palmers system depicted chiropractic as a conduit for both material and spiritualized versions of a vital principle reflecting popular contemporary therapies and nineteenth century metaphysical beliefs including the idea that the spine was home to occult forces The creation of chiropractic and other Progressive era versions of alternative medicine happened at a time when the relationship between science and religion took on an urgent increasingly competitive tinge Many remarkable people including the Palmers undertook highly personal reinterpretations of their physical and spiritual worlds In this context Folk reframes alternative medicine and spirituality as a type of populist intellectual culture in which ideologies about the body comprise a highly appealing form of cultural resistance

The Power of Parasites Dalia Iskander, 2021-11-30 This book describes how malaria both frustrates and facilitates life for Indigenous Palawan communities living in the forested foothills of the municipality of Bataraza on the island of Palawan in the Philippines Tracing the arc of malaria on the archipelago from colonial encounters to the present day it examines the ways in which malaria parasites have become entangled in contemporary lives It uniquely explores the experiences of local government leaders working towards sustainably developing this last ecological frontier health workers trying to meet international targets to eliminate malaria and Palawan people trying to keep their bodies social relations and the cosmos in careful balance In exquisite detail Dr Dalia Iskander shows how malaria emerged from and was intrinsic to a whole host of strategically orientated social practices that were enacted in as well as around the disease's name as people worked day to day to gain power in different guises in different arenas

Cultural Anthropology & Human Experience Katherine A. Dettwyler, 2011-03-31 Katherine A Dettwyler author of the Margaret Mead Awardwinning *Dancing Skeletons* has written a compelling and original introductory text *Cultural Anthropology* understand that humans are primates with culture with a complex overlay of environmental and cultural influences appreciate how powerful cultural beliefs and practices can be in shaping human perceptions of the world realize that culture is not the same thing as social constructions of race ethnic identity or place of geographic origin understand why how cultural practices make sense within the cultures that practice them articulate how an anthropological perspective helps discern everyday situations and interactions at the local national and international levels understand that anthropology is not just an academic discipline it is a way of looking at and understanding the world appreciate the ways cultural beliefs and practices social structures and human lifestyles contribute to a meaningful life

Religious Transformation in Maya Guatemala John P. Hawkins, 2021-05-01 Mayas and indeed all Guatemalans are currently experiencing the collapse of their way of life This collapse is disrupting ideologies symbols life practices and social structures that have undergirded their society for almost five hundred years and it is causing rapid and massive religious transformation among the K'iche' Maya living in highland western Guatemala Many Maya are converting to Christian Pentecostal faiths in which adherents and leaders become bodily agitated during worship Drawing on over fifty years of research and data collected by field school

students Hawkins argues that two factors cultural collapse and systematic social and economic exclusion explain the recent religious transformation of Maya Guatemala and the style and emotional intensity through which that transformation is expressed Guatemala serves as a window on religious change around the world and Hawkins examines the rapid pentecostalization of Christianity not only within Guatemala but also throughout the global South The pentecostal wail as he describes it is ultimately an acknowledgment of the angst and insecurity of contemporary Maya
