challenges of finding coherent answers to the four questions raised above and to describe some of the budding experimental solutions that challenge traditional conventions and assumptions

The Archetypal Imagination James Hollis, 2002-11-25 Also available in an open access full text edition at <http://oaktrust.library.tamu.edu/handle/1969.1/85764> What we wish to know and most desire remains unknowable and lies beyond our grasp With these words James Hollis leads readers to consider the nature of our human need for meaning in life and for connection to a world less limiting than our own In *The Archetypal Imagination* Hollis offers a lyrical Jungian appreciation of the archetypal imagination He argues that without the human mind s ability to form energy filled images that link us to worlds beyond our rational and emotional capacities we would have neither culture nor spirituality Drawing upon the work of poets and philosophers Hollis shows the importance of depth experience meaning and connection to an other world Just as humans have instincts for biological survival and social interaction we have instincts for spiritual connection as well Just as our physical and social needs seek satisfaction so the spiritual instincts of the human animal are expressed in images we form to evoke an emotional or spiritual response as in our dreams myths and religious traditions The author draws upon the work of the poet Rainer Maria Rilke s *Duino Elegies* to elucidate the archetypal imagination in literary forms To underscore the importance of incarnating depth

experience he also examines a series of paintings by Nancy Witt With the power of the archetypal imagination available to all of us we are invited to summon courage to take on the world anew to relinquish outmoded identities and defenses and to risk a radical re imagining of the larger possibilities of the world and of the self
