Staging Blackness and Performing Whiteness in Eighteenth-Century German Drama Wendy Sutherland, 2017-05-15 Focusing on eighteenth century cultural productions Wendy Sutherland examines how representations of race in philosophy anthropology aesthetics drama and court painting influenced the construction of a white bourgeois German self Sutherland positions her work within the framework of the transatlantic slave trade showing that slavery colonialism and the triangular trade between Europe West Africa and the Caribbean function as the global stage on which German bourgeois dramas by Friedrich Wilhelm Ziegler Ernst Lorenz Rathlef and Theodor K rner and a novella by Heinrich von Kleist on which K rner s play was based were performed against a backdrop of philosophical and anthropological influences Plays had an important role in educating the rising bourgeois class in morality Sutherland argues with fathers and daughters offered as exemplary moral figures in contrast to the depraved aristocracy At the same time black female protagonists in nontraditional dramas represent the boundaries of physical beauty and marriage eligibility while also complicating ideas of moral beauty embodied in the concept of the beautiful soul Her book offers convincing evidence that the eighteenth century German stage grappled with the representation of blackness during the Age of Goethe even though the German states were neither colonial powers nor direct participants in the slave trade

Ingenuity in the Making

Richard J. Oosterhoff, José Ramón Marcaida, Alexander Marr, 2021-11-09 *Ingenuity in the Making* explores the myriad ways in which ingenuity shaped the experience and conceptualization of materials and their manipulation in early modern Europe. Contributions range widely across the arts and sciences examining objects and texts, professions and performances, concepts and practices. The book considers subjects such as spirited matter, the conceits of nature, and crafty devices, investigating the ways in which ingenuity acted in and upon the material world through skill and technique. Contributors ask how ingenuity informed the maker's knowledge tradition where the perilous borderline between the genius of invention and disingenuous fraud was drawn, charting the ambitions of material ingenuity in a rapidly globalizing world. Cultural Approaches to the History of Medicine C. Usborne, W. Blécourt, 2003-12-18 A pioneering contribution to the cultural history of medicine exploring issues as diverse as dissection of the heart, childbirth, masturbation, animal care, hermaphrodites, orthopaedics, miracle drugs, smallpox, and sex advice in different European cultures from the 1600s to the present day. Each case study illustrates various roles of mediation, reconciling conflicting ideas in the medical encounter as an instrument of domination or conversely of resistance. Roy Porter's brilliant foreword conveys the methodological significance as well as the pleasure of these essays. *Editing the Image* Mark Cheetham, Elizabeth Legge, Catherine M. Soussloff, 2008-11-29 The editing process is a vital part of virtually every form of media. Primarily associated with texts and written language, editing is equally essential if less examined in regard to visual media. *Editing the Image* looks at the editing of visual media as both a series of technical exercises and as an allegory. It touches on concerns that are crucial to the history of art and visual culture as well as those media and institutions that produce and disseminate the visual arts in our society. Featuring contributors from a wide range of disciplines, *Editing the Image* considers editing in the context of academic journals, art historical texts, illustrated books, museum displays, and exhibitions. It is an inclusive analysis of visual forms commonly associated with the process of editing: photography, film, and video as well as some that are not intrinsically linked to editing: painting, sculpture, and architecture. In addition to wide-ranging academic considerations, this collection includes discussions of moving picture media and studio art by practitioners, giving the study a practical focus. For anyone who has considered the implications of the editorial process, this work will be of significant interest. *The Emotional Self* Deborah Lupton, 1998-06-18 This addition to a growing number of texts which approach emotions and emotionality from a social constructionist perspective is well written, scholarly, accessible, and interesting. There is both breadth and depth to this work. *Feminism and Psychology* This broad-ranging and accessible book brings together social and cultural theory with original empirical research into the nature of the emotional self in contemporary western societies. The emphasis of the analysis is on the emotional self as a dynamic project that is continually shaped and reshaped via discourse, embodied sensations, memory, personal biography, and interactions with others and objects. Using an interdisciplinary approach. **Pious Pursuits** Michele Gillespie, Robert Beachy, 2007-09-01 Recent work on the history of migration and the Atlantic World has underscored the importance of the political economies of Europe.

Africa and the Americas in the eighteenth century emphasizing the impact of these exchanges on political relations and state building and on economic structures commerce and wealth Too little of this work explores culture and identity outside the Anglo American context especially as reflected through religious developments of radical Pietists and other Germans the second largest group of migrants to the American colonies in the eighteenth century This volume offers a fresh vantage point from which to examine the Atlantic World Quick to traverse the conventional political boundaries that divided European states and American colonies Moravians departed their homeland to form new congregations in the most cosmopolitan European cities as well as on the North American frontier Pious Pursuits explores the lives and beliefs of Atlantic World Moravians as well as their communities and culture and it provides a new framework for analysis of the Atlantic World that is comparative and transnational

Lifestyle and Medicine in the Enlightenment James

Kennaway,Rina Knoeff,2020-03-09 The biggest challenges in public health today are often related to attitudes diet and exercise In many ways this marks a return to the state of medicine in the eighteenth century when ideals of healthy living were a much more central part of the European consciousness than they have become since the advent of modern clinical medicine Enlightenment advice on healthy lifestyle was often still discussed in terms of the six non naturals airs and places food and drink exercise excretion and retention and sleep and emotions This volume examines what it meant to live healthily in the Enlightenment in the context of those non naturals showing both the profound continuities from Antiquity and the impact of newer conceptions of the body Chapter 8 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution Non Commercial No Derivatives 4 0 license available at <http://www.taylorfrancis.com/books/e/9780429465642>

Medical Charlatanism in Early Modern Italy David Gentilcore,2006-09-21 From the mid sixteenth century onwards the Italian Protomedicato tribunals Colleges of Physicians or Health Offices jurisdiction varied from state to state required charlatans to submit their wares for inspection and upon approval pay a licence fee in order to set up a stage from which to perform and sell them The licensing of charlatans became an administrative routine As far as the medical magistracies were concerned charlatans had a defineable identity constituting a specific trade or occupation This book studies the way charlatans were represented by contemporaries and by historians how they saw themselves and most importantly it reconstructs the place of charlatans in early modern Italy It explores the goods and services charlatans provided their

dealings with the public and their marketing strategies It does so from a range of perspectives social cultural economic political geographical biographical and of course medical Charlatans are not just some curiosity on the fringes of medicine they offered health care to an extraordinarily wide sector of the population Moreover from their origins in Renaissance Italy the Italian ciarlatano was the prototype for itinerant medical practitioners throughout Europe This book offers a different look at charlatans It is the first to take seriously the licences issued to charlatans in the Italian states compiling them into a charlatans database of over 1 300 charlatans active throughout Italy over the course of some three centuries In addition it makes use of other types of archival documents such as trial records and wills to give the charlatans a human face as well as a wide range of artistic and printed sources not forgetting the output of the charlatans themselves in the form of handbills and pamphlets
