Yoo, Mai-Nhung Le, Alan Y. Oda, 2012-10-12 Asian Americans encounter a range of health issues often unknown to the American public policy makers researchers and even clinicians National research often combines Asian Americans into a single category not taking into account the differences and complexity among Asian ethnic subgroups The definition of Asian American derives from the U S Census Bureau s definition of Asian which includes peoples from all the vast territories of the Far East Southeast Asia and the South Asian Subcontinent While Census classifications determine demographic measurements that affect equal opportunity programs the broad rubric Asian American can never describe accurately the more than 50 distinct Asian American subgroups who together comprise multifaceted diversity across cultural ethnicities socio economic status languages religions and generations This volume rectifies that situation by exploring the unique needs and health concerns of particular subgroups within the Asian American community It consolidates a wide range of knowledge on various health issues impacting Asian Americans while also providing a discussion into the cultural social and structural forces impacting morbidity mortality and quality of life The volume is designed to advance the understanding of Asian American health by explaining key challenges and identifying emerging trends faced in specific ethnic groups and diseases illnesses innovative community based interventions and the future needed areas of research *The Social Sciences Go to Washington* Hamilton Cravens, 2004 What happens when the allegedly value free social sciences enter the national political arena In *The Social Sciences Go to Washington* scholars examine the effects of the massive influx of sociologists demographers economists educators and others to the federal advisory process in the postwar period Essays look at how these social scientists sought to change existing policies in welfare public health urban policy national defense environmental policy and science and technology policy and the ways they tried to influence future policies Policymakers have been troubled that followers of postmodernism have questioned the legitimacy of scientific and political authority to speak for the desires of social groups As the social sciences
