It was the first book to encompass the entire field from c 1730 when Hogarth published the first of his modern moral pictures to 1980. In addition to describing the careers and achievements of the artists and the characteristics of their styles, more than 500 entries give details of their publications, their illustrations to books and periodicals, exhibitions of their work, public collections in which their work is represented, and literature on or referring to them. More than 150 illustrations are included. This is a comprehensive reference work and will be of interest to social and political historians as well as cartoon and caricature enthusiasts.

Book Arts Collections Edward Ripley-Duggan, 1988 In response to the present day revival of interest in fine printing and binding, this unique volume highlights several of North America's special collections focusing on various aspects of the history and art of the book. Experts describe the scope, value, and utility of diverse collections in Canada, New York, California, Washington, New Jersey, and more, that reflect the collecting interests of librarians and private donors. Bibliophiles will be fascinated by the historical overviews of the collections on calligraphy, papermaking, bookbinding, printing, and illustration, and the insight into the future direction of library acquisitions. The addition of a list of readings provides a basic framework and helpful suggestions for further reading on the topics covered in this definitive book.
