Hood, Henry T. Frierson, Rodney K. Hopson, Keena N. Arbuthnot, 2022-08-16 Race and

Culturally Responsive Inquiry in Education examines how assumptions about race and culture have shaped US education research and the interpretation and implementation of its results This ambitious volume sheds light on the detrimental effects of educational praxis and policies that have characterized communities of color and historically underserved communities as deficient It reveals how such bias has affected many facets of educational inquiry from research design and planning to education policy making and evaluation practices The provocative essays in this work challenge traditional suppositions about whose evidence matters highlighting approaches for reframing educational inquiry and arguing for the adoption of a culturally responsive stance that can correct inequities by accounting for students diverse backgrounds and needs Edited by Stafford L Hood Henry T Frierson Rodney K Hopson and Keena N Arbuthnot and featuring contributions from leading and emerging scholars the collection is organized around three key areas education research educational assessment and program evaluation The contributors identify provocative problems that exist at the intersection of race and education in these areas and they illuminate the many ways in which education reform can address intersectionality Calling for effective action they suggest compelling solutions for consideration by policy makers and practitioners as well as researchers Together the essays in this volume make the case that culturally responsive methods that deepen our understanding of educational disparities appropriately measure what students know and can do and ensure that we have accurate information about the effectiveness of educational interventions can improve educational outcomes for diverse learners

Michael Pavel, Ella Inglebret, Stephanie Gail Wood, 2014 *An Age of Accountability* John L. Rury, 2023-10-13 An Age of Accountability highlights the role of test based accountability as a policy framework in American education from 1970 to 2020 For more than half a century the quest to hold schools and educators accountable for academic achievement

has relied almost exclusively on standardized assessment The theory of change embedded in almost all test based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps which repeatedly failed to materialize But even after very clear disappointments no other policy framework has emerged to challenge its hegemony The American public today has little confidence in institutions to improve the quality of goods and services they provide especially in the public sector As a consequence many Americans continue to believe that accountability remains a vital necessity even if educators and policy scholars disagree
