Education And Opportunity For What And For Whom:

Opportunity for Whom? Wendy Piatt, Peter Robinson, 2001 **Education and Opportunity** Gordon M.

Seely, 1977-01-01 A textbook including a short history of education in the United States and articles discussing the purpose and quality of schools who should run them civil liberties and the schools and how education might be improved **Who Should Pay?** Natasha Quadlin, Brian Powell, 2022-01-14 Americans now obtain college degrees at a higher rate than at any time in recent decades in the hopes of improving their career prospects At the same time the rising costs of an undergraduate education have increased dramatically forcing students and families to take out often unmanageable levels of student debt The cumulative amount of student debt reached nearly 1.5 trillion in 2017 and calls for student loan forgiveness have gained momentum Yet public policy to address college affordability has been mixed While some policymakers support more public funding to broaden educational access others oppose this expansion Noting that public opinion often shapes public policy sociologists Natasha Quadlin and Brian Powell examine public opinion on who should shoulder the increasing costs of higher education and why Who Should Pay draws on a decade's worth of public opinion surveys analyzing public attitudes about whether parents students or the government should be primarily responsible for funding higher education Quadlin and Powell find that between 2010 and 2019 public opinion has shifted dramatically in favor of more government funding In 2010 Americans overwhelmingly believed that parents and students were responsible for the costs of higher education Less than a decade later the percentage of Americans who believed that federal or state local government should be the primary financial contributor has more than doubled The authors contend that the rapidity of this change may be due to the effects of the 2008 financial crisis and the growing awareness of the social and economic costs of high levels of student debt Quadlin and Powell also find increased public endorsement of shared responsibility between individuals and the government in paying for higher education The authors additionally examine attitudes on the accessibility of college for all whether higher education at public universities should be free and whether college is worth the costs Quadlin and Powell also explore why Americans hold these beliefs They identify individualistic and collectivist world views that shape public perspectives on the questions of funding accessibility and worthiness of college Those with more individualistic orientations believed parents and students should pay for college and that if students want to attend college then they should work hard and find ways to achieve their goals Those with collectivist orientations believed in a model of shared responsibility one in which the government takes a greater level of responsibility for funding education while acknowledging the social and economic barriers to obtaining a college degree for many students The authors find that these belief systems differ among socio demographic groups and that bias sometimes unconscious and sometimes deliberate regarding race and class affects responses from both individualistic and collectivist oriented participants Public opinion is typically very slow to change Yet Who Should Pay provides an illuminating account of just how quickly public opinion has shifted regarding the responsibility

of paying for a college education and its implications for future generations of students *Early Childhood Care and Education and Equality of Opportunity* Kaspar Burger, 2013-01-11 Early childhood care and education has become a subject of increasing public interest in a great number of countries and among several international organizations and foundations This book focuses on key issues in early childhood care and education adding pedagogical historical and sociological perspectives to a body of research in education that has neglected important questions to date The studies presented focus on effects of early childhood care and education on children on the importance of family background for child development on the use of institutional services among different families on the history of such services in France and in the United States of America and on the way in which children acquire competences both in early childhood care and education institutions and in a family context *Education Policy and Equal Opportunity in Japan* Akito Okada, 2011-12-01 In many societies today educational aims or goals are commonly characterized in terms of equality equal opportunity equal access or equal rights the underlying assumption being that equality in some form is an intelligible and sensible educational ideal Yet there are different views and lively debates about what sort of equality should be pursued in particular the issue of equality of educational opportunity has served as justification for much of the postwar restructuring of educational systems around the world The author explores different interpretations of the concept of equality of educational opportunity in Japan especially as applied to post World War II educational policies By focusing on the positions taken by key actors such as the major political parties central administrative bodies teachers unions and scholars he describes how their concepts have developed over time and in what way they relate to the making of educational policy especially in light of Japan's falling birthrate and aging society **Education, Inclusion, and Justice** Joan McGregor, Mark C. Navin, 2022-08-30 This book approaches education as a vital human good both because it fosters the development of intellectual moral and civic virtues and because it promotes the development of valuable skills for work and for life Accordingly debates on justice democracy equality and inclusion often focus on questions concerning the kind of education people should receive how scarce educational goods should be distributed and the role of education in responding to historical and ongoing injustices This volume collects 16 new essays that explore these pressing ethical political and legal issues **Beyond Percentage Plans: The Challenge of Equal Opportunity in Higher Education** , 2002 *Higher Education Opportunity Act* United States, 2008 Bilingual Education Programs United States. Congress. House. Committee on Education and Labor. General Subcommittee on Education, 1967 Reauthorization of the Higher Education Act and Related Measures United States. Congress. House.
