Yearbook of the European Convention for the Prevention of Torture and Inhuman or Degrading Treatment or Punishment/Annuaire de la convention européenne pour la prévention de la torture et des peines ou traitements inhumains ou dégradants Council of Europe/Conseil de l'Europe,2019-06-07 The European Convention for the Prevention of Torture and Inhuman or Degrading Treatment or

Punishment was adopted by the Committee of Ministers of the Council of Europe in June 1987. It entered into force in February 1989 and all 47 member States are Parties to the Convention. The Convention has already established itself as an important human rights instrument. Its approach is quite different from that of the European Convention on Human Rights. Whereas the ECHR provides a remedy for particular human rights violations after the event, the Convention for the Prevention of Torture (ECPT) seeks to prevent human rights violations through a system of visits to places of detention. The Convention is intended to be an integrated part of the Council of Europe system for the protection of human rights, placing a proactive non-judicial mechanism alongside the reactive judicial mechanism established under the ECHR. The Yearbook of the European Convention for the Prevention of Torture offers an essential annual overview of developments in relation to the ECPT. The present volume is arranged as follows: Part One contains information as to ratifications etc. as at 31 December 2013 in the authentic English and French texts; Part Two has details in English and French of the membership and activities of the CPT for 2013; Part Three reprints the twenty-third annual General Report of the CPT in the official English and French texts; Part Four contains the CPT's reports to States and the State responses thereto that were made public during 2013. The CPT's reports are published in the official English and/or French texts and State responses in the English and/or French versions submitted by the States concerned. Bilingual English and French 3-volume set.

Sánchez, 2023-06-06 Medical Practice in Rural Communities MUTE, 2013-11-11. Despite the urbanization of the United States, the rural population exceeds 60 million and the provision of health services to these people remains a difficult problem. This volume addresses one crucial aspect of that problem: the task of attracting physicians to rural medical practice. It does this by carefully analyzing the special health problems and the general features of rural society in which the young doctor would be working. Rural health needs have been recognized in America for well over a century. In response, many organized health programs have in fact improved the situation. Compared to 1930, the present coverage of rural counties by public health agencies has been greatly extended. Thanks to the Hill-Burton Act of 1946, the availability of general hospital beds has become virtually equalized among the states with varying degrees of rurality. Federally subsidized and locally organized health programs are serving migratory workers, American Indians, the people of Appalachia, and other rural groups. Voluntary health insurance covers millions of rural families, even though the extent of this economic protection is less than among urban families. Medicare helps to protect the rural aged as it does the urban. Medicaid finances health services for the rural poor far more effectively than the purely local welfare programs of 1930. There is no question then about the improvement in rural health resources and services in America over the last 50 years. "Earth Day" Year Round United States. Office of Education, 1972.
