*MANAGEMENT AND ORGANIZATION* Dr. Shauli Mukherjee, Dr. Prarthita Biswas, Mr. Pranay Pandey & Mr. MAM Sameem, 2022-03-16. Introduction: Education is a complex process which involves different components such as pupils, teachers, employees, building, money, equipment, rules, and regulations, etc. All these components have to be managed properly in order to run the entire process smoothly. Educational Administration deals with all these components of education and integrates the different parts into a comprehensive whole for the smooth functioning of the educational process. We all know that for any process to run, we need different components, a proper procedure, and a machinery to fulfill its specific end in view. Educational administration is a comprehensive effort to integrate different components of education to achieve the aim and objectives of education. It is a dynamic side of education which generally deals with the educational practices. Educational administration always deals with an educational organization or institution, right from school, college, to university or any other seat of higher learning. It also deals with the different aspects of education such as planning, decision making, implementation of educational policies, evaluation, framing and implementing rules and regulations of the institution, finances, and different problems of pupils, teachers, employees, and above all, realization of some specific aims of education. *Today's Guide to Educational Policy* Joel Spring, 2021-04-12. In his latest book, Joel Spring covers major political, economic, and social issues affecting US and global education policy today. Crafted to evoke classroom discussion, this book explores contemporary issues such as the pandemic, institutional racism, religious controversies, nationalism, and immigration, increased reliance on online instruction, climate change, economics of education, and the deep state in education. Giving students the opportunity to engage in critical thinking and explore the growing sense that US and global education is in distress and in need of fundamental transformation, this book forces readers to examine their own values and how they might apply this thinking to their own education policy and practice. *Keeping and Improving Today's School Leaders* Bruce S. Cooper, Sharon Conley, 2011. With dwindling funds and resources, tougher state and federal standards, and fatigue from more regulations and testing, many school administrators are giving up—or crashing and leaving their posts. This book examines the process of sustaining and retaining quality leaders at the school and district levels. Beginning with a foreword by Michelle D. Young on the importance of administrative leadership in schools, subsequent chapters address six steps of critical organizational supports for leaders: the need for socializing assistant principals into their roles, administrators' perceptions of their administrative teams, school routines and rituals, the need for administrator mentoring of Latina/Latino leaders, the relationship between superintendent leadership and principal job satisfaction and efficacy. Concluding with thoughts about

retaining and sustaining the best leaders in dynamic environments the various chapters offer contemporary views on retaining and encouraging school administrators throughout the life cycle The chapters provide needed insight into what should and must be done to grow the best leaders for U S schools      *Information Technology in Educational Management* A.J.
