Educational Thought and Ideology in Modern Japan; State Authority and Intellectual Freedom 山口,Platzer, S.,1994 *Educational Thought and Ideology in Modern Japan* Teruhisa Horio,1988 Principle, Praxis, and the Politics of Educational Reform in Meiji Japan Mark Lincicome,1995-04-01 Scholars of modern Japan agree that education played a crucial role in that country's rapid modernization during the Meiji period 1868-1912. With few exceptions, however, Western approaches to the subject treat education as an instrument of change controlled by the Meiji political and intellectual elite. *Principle Praxis and the Politics of Educational Reform in Meiji Japan* offers a corrective to this view. By introducing primary source materials including teaching manuals, educational periodicals, and primary school textbooks missing from most English language works, Mark Lincicome examines an early case of resistance to government control that developed within the community of professional educators. He focuses on what began in 1872 as an attempt by the newly established Ministry of Education to train a corps of professional teachers that could civilize and enlighten the masses in compulsory primary schools. Through the Tokyo Normal School and other new teacher training schools sponsored by the government, the ministry began what it thought was a straightforward technology transfer of the latest teaching methods and materials from the United States and Europe. Little did the ministry realize that it was planting the seeds of broader reform that would challenge not only its underlying doctrine of education but its very authority over education. The reform movement centered around efforts to explicate and disseminate the doctrine of *kaihatsushugi* (developmental education). Hailed as a modern scientific approach to child education, it rejected rote memorization and passive learning elements of the so-called method of pouring in *chunyu* knowledge practiced during the preceding Tokugawa period and sought instead to cultivate the unique innate abilities of each child. Orthodox ideas of education, knowledge, and the process by which children learn were challenged. The position and responsibilities of the teacher were enhanced, consequently providing educators with a claim to professional authority and autonomy at a time when the Meiji state was attempting to control every facet of the Japanese school system. *Principle Praxis and the Politics of Educational Reform in Meiji Japan* analyzes a key element to understanding Meiji development and modern Japan as a whole. **Imperial Subjects as Global Citizens** Mark Elwood Lincicome,2009-01-01 This book offers a new perspective on Japanese educational policy reforms that have been enacted under the guise of internationalization since the late 1980s. Current policy agendas are contextualized within the framework of repeated attempts to internationalize education (*kyoiku no kokusaika*) in Japan. Changing Histories Ryôta Nishino,2011-06-16 The teaching of history in South African and Japanese schools has attracted sustained criticism for the alleged attempts to conceal the controversial aspects of their countries' past and to inculcate ideologies favourable to the ruling regimes. This book is the first attempt to systematically compare the ways in which education bureaucracy in both nations dealt with opposition and critics in the period from ca. 1945 to 1995, when both countries were dominated by single party governments.

for most of the fifty years The author argues that both South African and Japanese education bureaucracy did not overtly express its intentions in the curriculum documents or in the textbooks but found ways to enhance its authority through a range of often subtle measures A total of eight themes in 60 officially approved Standard 6 South African and Japanese middle school history textbooks have been selected to demonstrate the changes and continuity This work hopes to contribute to the existing literature of comparative history by drawing lessons that would probably not have emerged from the study of either country by itself The dissertation won a publication prize at Georg Eckert Institute for Textbook Research

Hein, Mark Selden, 2016-09-16 Considering the great influence textbooks have as interpreters of history politics and culture to future generations of citizens it is no surprise that they generate considerable controversy Focusing largely on textbook treatment of lingering and sometimes explosive tensions originating in World War II *Censoring History* addresses issues of textbook nationalism in historical and comparative perspective Discussions include Japan's Comfort Women and the Nanjing Massacre Nazi genocide against the Jews Gypsies Catholics and others Hiroshima and Nagasaki and the Indochina wars The essays address controversies over textbook content around the globe How and why do specific representations of war evolve What are the international and national forces affecting how textbook writers publishers and state censors depict the past How do these forces differ from country to country Other comparative essays analyze nationalist and war controversies in German US and Chinese textbook debates

Rivers, Stephanie Ann Houghton, 2013-07-18 Within foreign language education contexts across the globe inadequate attention has been paid to documenting the dynamics of identity development negotiation and management This book looks at these dynamics in specific relation to otherness in addition to attitudinal and behavioural overtones created through use of the term foreign despite its position as an integral marker in language acquisition discourse This book argues that individual identities are multidimensional constructs that gravitate around a hub of intricate social networks of multimodal intergroup interaction The chapters pursue a collective desire to move the notion of identity away from theoretical abstraction and toward the lived experiences of foreign language teachers and students While the identities entangled with these interactions owe a significant measure of their existence to the immediate social context they can also be actively developed by their holders The collection of chapters within this book demonstrate how foreign language education environments traditional and non traditional are ideal locations for the development of a sophisticated repertoire of discursive strategies used in the formulation navigation expression and management of social identities and multiple selves

The Cross-cultural Transfer of Educational Concepts and Practices Masahiro Tanaka, 2005-05-16 This book analyses comparatively the creation of American and Japanese universities on the model of German universities largely in the late nineteenth century and the reform of German and Japanese universities on the model of American universities after the end of the Second World War The argument is that transferring educational concepts and practices from one cultural context to another involves not merely a transfer but a transformation How and why this transformation occurs is what this book is about More precisely it is suggested that transformation of educational concepts and practices during their cross cultural movement can be understood within a theoretical perspective that is proposed and developed in the book This book is divided into six chapters Chapter One as the introduction analyses several scholars approaches to the aspects of educational transfer then attempts to construct a theoretical perspective for the book on the processes of change in educational concepts and practices during their movement across cultures Chapters Two and Three offer two narratives to investigate how German university concepts and practices were transmuted as a consequence of local actors efforts to import these concepts and practices into Japan and the United States Chapters Four and Five provide another two narratives to examine how American university concepts and practices were altered as a result of American actors attempts to export these concepts and practices to Japan and Germany Chapter Six as the conclusion through reflecting on the four narratives given in the main chapters re examines the ways in which the theoretical perspective of this book is useful to understand the processes of transformation of educational concepts

and practices during their movement from one culture to another
