guide to over 250 statistical publications and sources from government and private organizations European Universities in Transition Carmelo Mazza,Paolo Quattrone,Angelo Riccaboni,2008-01-01 This attractively presented edited collection is a welcome analysis of issues facing universities It consists of 14 chapters by experts who work in university management and economics departments this is an excellent collection Its value stems from the fact that it enables comparisons to be made and to see that globally the traditional university system is being seriously challenged The authors in this collection provide a range of perspectives on how the universities in their various locations can begin to respond to these challenges Anthony Potts Journal of Educational Administration and History The future of the university this old European institution is of utmost interest not only to university students and teachers but to whole societies not only in Europe but in the whole world as the institution has become global Nobody can predict it but the editors of this volume were able to ask incisive questions and collected thoughtful and provocative answers which can contribute to the debate on the fate of universities in a significant way Barbara Czarniawska University of Gothenburg Sweden While acknowledging the value of better university management this book resists the idea that an externally imposed standardization and a more homogenous European system of higher education adds up to a desiderata On the contrary the book editors argue that the persistence of the university and its

survival in the future is aided by differences between universities European Universities in Transition is must reading for students of higher education reform Francisco O Ramirez Stanford University US This timely and important book provides a critical analysis of the changes and challenges that currently affect European universities Using both theoretical contributions and applied case studies leading experts argue that universities as institutions are in need of change although the routes that the process may take are heterogeneous The authors debate whether the reform of universities suffers from the undue influence of generalisations that do not stand up to scrutiny It is simply too narrow to focus on strategies such as imitating a university model hoping that best practices will solve the inefficiencies of the organisation as a whole or relying on the presence of few external individuals on the universities board to save the difficult relationships between the university and the surrounding economy and society These ideas ignore the diversity of universities geographically and historically Above all they underestimate the power that such diversity holds in making universities survive across centuries Researchers with an interest in university reform will appreciate this important contribution to the debate whilst policymakers and university administrators will find this book invaluable in understanding the changes and problems facing European universities and gaining insights on possible solutions

Fixing Higher Education Christian Schierenbeck, 2012-11-06 Christian Schierenbeck makes a provocative case that higher education across the globe suffers from a profound productivity crisis which prevents broad access to affordable and high quality educational services He shows how the vast productivity gap in higher education could be closed if academic managers borrowed some of the managerial practices applied by the world's leading business enterprises In order for this to happen in practice the author argues for radical changes in the policy

framework for higher education

Questioning Excellence in Higher Education Michele Rostan, Massimiliano

Vaira, 2012-01-01 Excellence in higher education is as old as university but nowadays the concept is widely emphasized and its meaning has been redefined on the basis of different values and goals especially those related to market Excellence has become the meter on which institutions are assessed and public funding allocated the tool by which worldwide comparisons and rankings of institutions are built and a marketable brand used by higher education institutions to present themselves This book offers an international and comparative view on excellence in higher education ranging from policies to practices mainly based on research results and empirical evidence aiming at questioning the concept and its uses which are not only social constructions but also political ones Far from being a neutral or technical concept excellence is heavily infused with values which must be traced analysed and made critical to understand its impacts backlashes and unintended outcomes on higher education systems institutions academics and students The book is addressed to an international audience and in particular to higher education scholars and professionals Those who are involved in higher education assessment members of professional bodies and organizations in the higher education field students in education but also policy makers and the public opinion at large will profit from the works of a selected group of scholars coming from a variety of countries A sense of disquietude seems ever present when discussing new digital practices The transformations incurred through these can be profound troublesome in nature and far reaching Moral panics remain readily available

Breaking Ranks Colin

Diver, 2022-04-12 Some colleges will do anything to improve their national ranking That can be bad for their students and for higher education Since U S News World Report first published a college ranking in 1983 the rankings industry has become a self appointed judge declaring winners and losers among America s colleges and universities In this revealing account Colin Diver shows how popular rankings have induced college applicants to focus solely on pedigree and prestige while tempting educators to sacrifice academic integrity for short term competitive advantage By forcing colleges into standardized best college hierarchies he argues rankings have threatened the institutional diversity intellectual rigor and social mobility that is the genius of American higher education As a former university administrator who refused to play the game Diver leads his readers on an engaging journey through the mysteries of college rankings admissions financial aid spending policies and academic practices He explains how most dominant college rankings perpetuate views of higher education as a purely consumer good susceptible to unidimensional measures of brand value and prestige Many rankings he asserts also undermine the moral authority of higher education by encouraging various forms of distorted behavior misrepresentation and outright cheating by ranked institutions The recent Varsity Blues admissions scandal for example happened in part because affluent parents wanted to get their children into elite schools by any means necessary Explaining what is most useful and important in evaluating colleges Diver offers both college applicants and educators a guide to pursuing their highest academic goals freed from the siren song of the best college illusion Ultimately he reveals how to break ranks with a

rankings industry that misleads its consumers undermines academic values and perpetuates social inequality

Occupational Projections and Training Data Government Publishing Office, 2010-06-23 This statistical supplement to the Occupational Outlook Handbook provides data to support the information presented in the Handbook Researchers can compare over 500 occupations on factors such as employment changes job openings earnings unemployment rates and training requirements

The Impact of Higher Education Ranking Systems on Universities Kevin Downing, Petrus Johannes Looock, Sarah Gravett, 2021-04-04 This book written by three generations of rankings academics with considerable experience from three very different regions of the globe lifts the lid on the real impact of higher education ranking systems HERS on universities and their stakeholders It critically analyses the criteria that make up the Big Three global ranking systems and using interviews with senior administrators academics and managers discusses their impact on universities from four very different continents Higher education continues to be dominated by a reputational hierarchy of institutions that sustains and is reinforced by HERS Despite all the opinions and arguments about the legitimacy of the rankings as a construct it seems experts agree that they are here to stay The question therefore seems to be less about whether or not universities should be compared and ranked but the manner in which this is undertaken Delivering a fresh perspective on global rankings this book summarizes the development of HERS and provides a critical evaluation of the effects of HERS on four different major regions South Africa the Arab region South East Asia and Australia It will appeal to any academic student university administrator or governing body interested in or affected by global higher education ranking systems

Higher Education and Equality of Opportunity Fred A. Lazin, N. Jayaram, Matt Evans, 2012-07-10 The movement to broaden access to public universities the dominant strategy during the 1970s and 1980s has largely shifted to enable the marketplace rather than the government to shape the contours of higher education Government funding is being reduced affirmative action and other programs designed to insure broader access are in decline and personal fulfillment is replacing a public good designed to insure greater equality of opportunities This book explores the impact of diminishing government resources and expanding market forces in developing and developed countries to either foster or lessen equality of opportunities in higher education for different racial ethnic religious and gender groupings What are the consequences of a market driven higher education for student access teaching and scholarship Through case studies this book explores issues such as access of minority groups within the larger societies the place of foreign students in a national system and access for students with mental health difficulties and evaluates the success of funding schemes designed to expand opportunities and access The research provides an interesting contrast of the diversity and uniqueness of higher education in the United States France Australia India Israel South Korea The Netherlands Ghana and several other countries while at the same time revealing surprising commonalities These studies reveal world wide trends in higher education including a cutback in government financing a decline in access and a receding of affirmative action This book is an important addition to the

literature on higher education during the age of globalization and the decline of government funding of higher education The studies provide important data about the current situation in higher education in countries around the world **The Condition of Education** ,2009
