Elites and Identities in Post-Soviet Space David Lane, 2013-09-13 The dissolution of the communist system led to the creation of new states and the formation of new concepts of citizenship in the post Soviet states of Central and Eastern Europe The formation of national identity also occurred in the context of the process of increasing economic and political globalisation particularly the widening of the European Union to include the central European post socialist and Baltic States Internationally Russia sought to establish a new identity either as a European or as a Eurasian society and had to accommodate the interests of a wider Russian Diaspora in the near abroad This book addresses how domestic elites regional political and economic influenced the formation of national identities and the ways in which citizenship has been defined A second component

considers the external dimensions the ways in which foreign elites influenced either directly or indirectly the concept of identity and the interaction with internal elites The essays consider the role of the European Union in attempting to form a European identity Moreover the growing internationalisation of economies privatisation monetary harmonisation dependence on trade also had effects on the kind of national identity sought by the new nation states as well as the defining by them of the other The collection focuses on the interrelations between social identity state and citizenship formation and the role of elites in defining the content of concepts in different post communist societies This book was originally published as a special issue of Europe Asia Studies *Elite Recruitment and Coherence of the Inner Core of Power in Finland* Ilkka

Ruostetsaari,2015-07-01 The book outlines the approaches of classical elite theory and democratic elitism for the study of national power structures The book displays different research methods for elite study as well as the power conceptions included within these methods An elite structure typology is derived from the elite theory and applied to chart the changes in the elite structure of one country Finland The data of this work is unique in international comparison postal surveys were conducted among the elites and the citizenry in 1991 2001 and 2011 The study explores empirically the changes occurring in the elite structure from the early 1990s to the present day a period that has been characterized by important societal upheavals such as the great recession of the early 1990s Finland's accession to the European Union in 1995 and the international financial crisis and the Eurozone debt crisis in the 2000s The main focus is on how the elite structure has changed in terms of vertical social mobility i e openness on the one hand and horizontal mobility i e coherence on the other With regard to vertical social mobility the research interest focuses on changes in elites social background and various factors advancing their recruitment and career into elite positions As for horizontal mobility the study focuses on the elites different channels of contact with other influential groups in society networking with various societal institutions the attitudinal unanimity within various elites and between the elites and the citizenry mobility between different elite groups i e circulation the accumulation of power positions and the retention and loss of elite positions The findings are compared with previous international studies especially Scandinavian elite studies Finally the study considers what the results tell us about the state of democracy *The Contested Status of Political Elites* Lars Vogel,Ronald Gebauer,Axel Salheiser,2018-07-17

Governing the Locals Tomila Lankina, 2006-11-24 This book examines the impact of Russia's local self governing institutions on nationalist movement mobilization in Russia It is the first study identifying municipalities as central to explaining aspects of ethnic or broader social activism in post Soviet Russia Because the *Frontiers of Civil Society* Marek Mikuš, 2018-06-13 In Serbia as elsewhere in postsocialist Europe the rise of civil society was expected to support a smooth transformation to Western models of liberal democracy and capitalism More than twenty years after the Yugoslav wars these expectations appear largely unmet *Frontiers of Civil Society* asks why exploring the roles of multiple civil society forces in a set of government reforms of society and individuals in the early 2010s and examining them in the broader context of social struggles over neoliberal restructuring and transnational integration Weak States, Strong Societies Amin Saikal, 2015-11-27 Since the disintegration of the Soviet Union and the end of the Cold War the previously well established organisation of world politics has been thrown into disarray While during the Cold War the bipolarity of the world gave other powers a defined structure within which to vie for power influence and material wealth the current global political landscape has been transformed by a diffusion of power As a result the world has seen the rise of sub national or quasi non state actors such as Hezbollah al Qaeda and the movement that calls itself Islamic State or ISIS These dramatic geopolitical shifts have heavily impacted state society relationships power and authority in the international system *Weak States Strong Societies* analyses the effect of these developments on the new world order arguing that the framework of weak state strong society appears even more applicable to the contemporary global landscape than it did during the Cold War Focusing on a range of regional contexts the book explores what constitutes a weak or strong state It will be essential reading for specialists in politics and international relations whether students or academic researchers Kazakhstan in the Making Marlene Laruelle, 2016-11-21 Kazakhstan is one of the best known success stories of Central Asia perhaps even of the entire Eurasian

space It boasts a fast growing economy at least until the 2014 crisis a strategic location between Russia China and the rest of Central Asia and a regime with far reaching branding strategies But the country also faces weak institutionalization patronage authoritarianism and regional gaps in socioeconomic standards that challenge the stability and prosperity narrative advanced by the aging President Nursultan Nazarbayev This policy oriented analysis does not tell us a lot about the Kazakhstani society itself and its transformations This edited volume returns Kazakhstan to the scholarly spotlight offering new multidisciplinary insights into the country s recent evolution drawing from political science anthropology and sociology It looks at the regime s sophisticated legitimacy mechanisms and ongoing quest for popular support It analyzes the country s fast changing national identity and the delicate balance between the Kazakh majority and the Russian speaking minorities It explores how the society negotiates deep social transformations and generates new hybrid local and global cultural references

Wage Distribution Fairness in Post-Socialist Countries Zsófia Ignácz, 2017-10-30 Fairness of wage distribution or the perception of such is a phenomenon crucial for the stability of new democracies While theories exist about how change of the political system trickles down to the attitudinal level the systematic analysis of the effect of economic transition on public attitudes has been neglected to a large extent Wage Distribution Fairness in Post Socialist Countries proposes a conceptual framework to measure the fairness of wage distribution Indeed looking particularly at wage distribution fairness in three post socialist societies Hungary East Germany Czech Republic since the transition in 1989 this challenging monograph also aims to understand if and to what extent the experience of a socialist regime motivates individuals to consider wage distribution as fair Contributing to our understanding of the relevance of socialization and other situational factors influencing economic legitimacy Wage Distribution Fairness in Post Socialist Countries will appeal to undergraduate and postgraduate students as well as postdoctoral researchers interested in fields including Sociology Eastern European Studies and Political Economics

Post-Communist Ukraine Bohdan Harasymiw, 2002-02-20 Analysis of successes of Ukraine and its more frequent failures during its transition from authoritarianism to democracy

Migration, Refugee Policy, and State Building in Postcommunist Europe Oxana Shevel, 2011-10-24 Why do similar postcommunist states

respond differently to refugees Why do some states privilege certain refugee groups while other states do not This book presents a theory to account for this puzzle and it centers on the role of the politics of nation building and of the office of the UN High Commissioner for Refugees UNHCR A key finding of the book is that when the boundaries of a nation are contested and thus there is no consensus on which group should receive preferential treatment in state policies a political space for a receptive and nondiscriminatory refugee policy opens up The book speaks to the broader questions of how nationalism matters after communism and under what conditions and through what mechanisms international actors can influence domestic policies The analysis is based on extensive primary research the author conducted in four languages in the Czech Republic Poland Russia and Ukraine

Perceptions of the European Union in New Member States Gabriella Ilonszki, 2013-10-31 The book explores the views of elites alongside those of the wider population in the European Union The chapters place the new member states and the potential candidate Serbia on the map of Europe in this context for the first time The volume's comparative method goes beyond the standard old member states versus new member states divide It assesses regional differences within Central Europe and evaluates the problem of European and national identity formation perception of external threats to the EU including Russia differences between economic and political elite views about the integration process and the connection between national performance and public opinion about Europe Even though in each country positive views are dominant about the integration process heterogeneous views prevail behind the image of a unifying Europe The book's major contribution is that it makes the new member states more visible and provides hard evidence while remaining theoretically driven Furthermore it covers the most important topics that emerge in studies concerning European integration The book is intended for those interested in European integration in general but Central and Eastern European comparativists will find it particularly useful This book was published as a special issue of *Europe Asia Studies*
