Epic Song:

The Epic Songs of Russia Hapgood, Isabel Florence Hapgood, 1886 *Empire of Song* Dafni Tragaki, 2013-07-11 The Eurovision Song Contest ESC is more than a musical event that ostensibly unites European people through music. It is a spectacle, a performative event that allegorically represents the idea of Europe. Since its beginning in the Cold War era, the contest has functioned as a symbolic realm for the performance of European selves and the negotiation of European identities. Through the ESC, Europe is experienced, felt, and imagined in singing and dancing as the interplay of tropes of being local and/or European is enacted. In *Empire of Song: Europe and Nation in the Eurovision Song Contest*, contributors interpret the ESC as a musical mediascape and mega event that has variously performed and performs the changing visions of the European project. Through the study of the cultural politics of the ESC, contributors discuss the ways in which music operates as a dynamic nexus for making national identities and European sensibilities, generating processes of assimilation or integration and defining the celebrated notion of the European citizen in a global context. Scholars in the volume also explore the ways otherness and difference are produced, spectacularized, challenged, or even neglected in the televised musical realities of the ESC. For the contributing authors, song serves as a site for constituting Europe and the nation on and offstage. History and politics, as well as the constant production of European subjectivities, are sounded in song. The Eurovision song is a shifting realm where old and new states imagine their pasts, question their presents, and envision ideal futures in the New Europe. Essays in *Empire of Song* adopt theoretical and epistemological orientations in their exploration of popular music within ethnomusicology and critical musicology, questioning the idea of Europe and the nation through and in music at a time when the European self appears more fragmented, if not entirely shattered. Bringing together ethnomusicology, music studies, history, social anthropology, feminist theory, linguistics, media ethnography, postcolonial theory, comparative literature, and philosophy, *Empire of Song* will interest students and scholars in a vast array of disciplines.

The Nenets' Song Alla Abramovich-Gomon, 2019-01-04 First published in 1999, *The Nenets Song* is the first book-length study of the epic song tradition that survives among the Nenets nation of Northern Eurasia, an area which is also the homeland of such widely known epics as the Finnish *Kalevala* and Yakut *Olonkho*. The book considers the Nenets song tradition within its historical, cultural, social, and political contexts and focuses on its melodic system, viewed as a manifestation of musical thought and knowledge. Alla Abramovich-Gomon provides a description of the Nenets way of life and their song performances, which she has observed while carrying out her field research. The book unravels the epic song's ties with the Nenets shamanistic past and elaborates on a number of cross-disciplinary theories involved in shaping a holistic interpretation of the song tradition. The study concludes that the Nenets song tradition embodies the whole of their traditional mother culture and has contributed to the people's survival and adaptation.

Poetry in Speech Egbert J. Bakker, 2018-03-15 Applying linguistic theory to the study of Homeric style Egbert J Bakker offers a highly innovative approach to oral poetry particularly the poetry of Homer By situating formulas and other features of oral style within the wider contexts of spoken language and communication he moves the study of oral poetry beyond the landmark work of Milman Parry and Albert Lord One of the book's central features related to the research of the linguist Wallace Chafe is Bakker's conception of spoken discourse as a sequence of short speech units reflecting the flow of speech through the consciousness of the speaker Bakker shows that such short speech units are present in Homeric poetry with significant consequences for Homeric metrics and poetics Considering Homeric discourse as a speech process rather than as the finished product associated with written discourse Bakker's book offers a new perspective on Homer as well as on other archaic Greek texts Here Homeric discourse appears as speech in its own right and is freed Bakker suggests from the bias of modern writing style which too easily views Homeric discourse as archaic implicitly taking the style of classical period texts

as the norm Bakker's perspective reaches beyond syntax and stylistics into the very heart of Homeric and ultimately oral poetics altering the status of key features such as meter and formula rethinking their relevance to the performance of Homeric poetry and leading to surprising insights into the relation between speech and text in the encounter of the Homeric tradition with writing

Orality, Textuality, and the Homeric Epics Jonathan L. Ready, 2019-07-30 Written texts of the Iliad and the Odyssey achieved an unprecedented degree of standardization after 150 BCE but what about Homeric texts prior to the emergence of standardized written texts Orality Textuality and the Homeric Epics sheds light on that earlier history by drawing on scholarship from outside the discipline of classical studies to query from three different angles what it means to speak of Homeric poetry together with the word text Part I utilizes work in linguistic anthropology on oral texts and oral intertextuality to illuminate both the verbal and oratorical landscapes our Homeric poets fashion in their epics and what the poets were striving to do when they performed Looking to folkloristics part II examines modern instances of the textualization of an oral traditional work in order to reconstruct the creation of written versions of the Homeric poems through a process that began with a poet dictating to a scribe Combining research into scribal activity in other cultures especially in the fields of religious studies and medieval studies with research into performance in the field of linguistic anthropology part III investigates some of the earliest extant texts of the Homeric epics the so called wild papyri By looking at oral texts dictated texts and wild texts this volume traces the intricate history of Homeric texts from the Archaic to the Hellenistic period long before the emergence of standardized written texts in a comparative and interdisciplinary study that will benefit researchers in a number of disciplines across the humanities
