International Conference on Differential Equations H.A. Antosiewicz, 2014-05-10 International Conference on Differential Equations contains the proceedings of an International Conference on Differential Equations held at the University of Southern California on September 3-7 1974 The papers review advances in the qualitative analytic theory of differential equations and highlight three broad areas analytic theory singular perturbations qualitative theory boundary value problems and mathematical control theory variational methods Comprised of 82 chapters this book begins with a discussion on continuous extensions their construction and their application in the theory of differential equations The reader is then

introduced to an approach to boundary control of partial differential equations based on the theory of semigroups of operators lower closure and existence theorems in optimal control and a nonlinear oscillation theorem Subsequent chapters focus on matrices of rational functions asymptotic integration of linear differential systems solutions near bifurcated steady states and geometric views in existence theory This monograph will be of interest to students and instructors of mathematics

Differential Equations C. Perello,1993 **Equadiff-91 - International Conference On Differential Equations (In 2 Volumes)** C Perello,C Simo,Morales J De Sola,1993-05-25 Equadiff 91 stems from the series of conferences initiated by the late Professor Vogel The first conference Equadiff 70 which was held in Marseille Since then similar conferences had been held in Brussels Florence Wurzburg as well as Xanthi The purpose of the Equadiff series of conferences is to present the latest development in the field of differential equations both ordinary and partial including their numerical treatment and applications to the mathematics community These conferences had attracted renowned mathematicians from all over the world to present their studies and findings The latest conference under the series was Equadiff 91 held in Barcelona It attracted some 30 renowned mathematicians Researchers and graduate students of pure and applied mathematics will find this compilation of conference proceedings up to date relevant and insightful **International Conference on**
