Eric's Discovery

Eric's Discovery:

The Betrayal of Witness Stanley Hauerwas, Hans S. Reinders, 2024-04-16 The downfall of Jean Vanier due to the history of sexual abuse that came to light in 2020 has shocked everyone familiar with his life and work as the founder and leader of L'Arche. The authors in this book raise significant questions regarding his influential legacy and its relevance for theology and disability and for L'Arche in particular. Without any attempt to whitewash or downplay the seriousness of his transgressions, the question cannot be avoided to sort out the good and the bad in Vanier. It requires soul searching on the part of his theological heirs and those who have been influenced by him. Finally, his work with and influence upon L'Arche raises the question of sustainability and how its communities might or might not be shaped by his tarnished legacy. **The Norse**

Discovery of America Unknown, 2020-09-28 The Pre-Columbian Discovery of America by the Northmen Benjamin Franklin] De Costa, 1868 Technology and Postmodern Subjectivity in Don DeLillo's Novels Randy Laist, 2010 More than any other major American author, Don DeLillo has examined the manner in which contemporary American consciousness has been shaped by the historically unique incursion into daily life of information, military, and consumer technologies. In DeLillo's fictions, technological apparatuses are not merely set pieces in the characters' environments nor merely tools to move the plot along; they are sites of mystery and magic, whirlpools of space, time, and convex mirrors of identity. Television sets, filmic images, automobiles, airplanes, telephones, computers, and nuclear bombs are not simply objects in the world for DeLillo's characters; they are psychological phenomena that shape the possibilities for action, influence the nature of perception, and incorporate themselves into the fabric of memory and identity. DeLillo is a phenomenologist of the contemporary technoscape and an ecologist of our new kind of natural habitat. Through a close reading of four DeLillo novels, *Technology and Postmodern Subjectivity in Don DeLillo's Novels* examines the variety of modes in which DeLillo's fictions illustrate the technologically mediated confluence of his human subjects and the field of cultural objects in which they discover themselves. The model of interactionism between human beings and technological instruments that is implicit in DeLillo's writing suggests significant applications both to the study of other contemporary novelists as well as to contemporary cultural studies.
