Escalation Control And The Nuclear Option In South Asia:

Escalation Control and the Nuclear Option in South Asia Michael Krepon, Rodney W. Jones, Ziad Haider, Henry L. Stimson Center, 2004 **Asymmetric Warfare in South Asia** Peter R. Lavoy, 2009-11-12 A unique account of military conflict under the shadow of nuclear escalation with access to the soldiers and politicians involved India's Evolving Deterrent Force Posturing in South Asia Zulfqar Khan, Zafar Khan, 2020-12-16 The book discusses India's evolving deterrent force posturing in South Asia under the conceptual essentials of nuclear revolution when it comes to various combinations of conventional and nuclear forces development and the strategic implications it intentionally or unintentionally poses for the South Asian region. The book talks about how the contemporary restructuring of India's deterrent force posture affects India's nuclear strategy in general and how this in turn could affect the policies of its adversaries China and Pakistan in particular. Authors discuss the motivations of such posturing that broadly covers India's restructuring of its Nuclear Draft Doctrine (NDD) the ballistic missile development program including that of its Ballistic Missile Defence (BMD) system and the possibility of conflicts between China, India, and India-Pakistan given their transforming strategic force postures and their recurring adversarial behavior against each other in the Southern Asian region Inside Nuclear South Asia Scott Douglas Sagan, 2009-08-17 This book presents an analytical account of the causes and dangerous consequences of nuclear proliferation in South Asia *The Politics of Nuclear Weapons in South Asia* Dr. Bhumitra Chakma, 2013-04-28 An important and critical re-evaluation of South Asia's post-tests nuclear politics in contrast to other books, this volume emphasises the political dimension of South Asia's nuclear weapons, explains how the bombs are used as politico-strategic assets rather than pure battlefield weapons, and how India and Pakistan utilise them for politico-strategic purposes in an extremely complex and competitive South Asian strategic landscape. Written by a group of perceptive observers of South Asia, this volume evaluates the current state of Indo-Pakistani nuclear deterrents, the challenges that the two countries confront in building their nuclear forces, the post-test nuclear doctrines of the two strategic rivals, the implications of Indo-Pakistani politics for regional cooperation, the role of two systemic actors, USA and China, in the region's nuclear politics, and the critical issues of confidence building and nuclear arms control Pakistan's Nuclear Policy Zafar Khan, 2014-07-17 In May 1998, in reaction to India's nuclear weapons tests, Pakistan tested six nuclear weapons. Following this, the country opted for a policy of minimum deterrence, and within a year, Pakistan had altered its policy stance by adding the modifier of minimum credible deterrence. This book looks at how this seemingly innocuous shift seriously impacted on Pakistan's nuclear policy direction and whether the concept of minimum has lost its significance in the South Asian region's changed strategic environment. After providing a brief historical background, exploring why and how Pakistan carried out the nuclear development program, the book questions why Pakistan could not sustain the minimum deterrence that it had conceptualized in the immediate aftermath of the 1998 test. It examines the conceptual/theoretical framework of the essentials of minimum

deterrence in order to question whether Pakistan's nuclear policy remained consistent with this as well as to discover the rudimentary factors that are responsible for the inconsistencies with regard to minimum deterrence conceived in this study. The book goes on to look at the policy options that Pakistan had after acquiring the nuclear capability and what the rationale was for selecting minimum deterrence. The book not only highlights Pakistan's deterrent force building but also analyzes closely Pakistan's doctrinal posture of first use option. Furthermore, it examines the policy towards arms control and disarmament and discusses whether these individual policy orientations are consistent with the minimum deterrence. Conceptually providing a deeper understanding of Pakistan's post 1998 nuclear policy, this book critically examines whether the minimum deterrence conceived could be sustained both at the theoretical and operational levels. It will be a useful contribution in the field of Nuclear Policy, Security Studies, Asian Politics, Proliferation, Non-Proliferation Studies, and Peace Studies. This book will be of interest to policy makers, scholars, and students of nuclear policy, nuclear proliferation, and arms control related research.

No Exit from Pakistan Daniel S. Markey, 2013-10-07 This book tells the story of the tragic and often tormented relationship between the United States and Pakistan. Pakistan's internal troubles have already threatened US security and international peace, and Pakistan's rapidly growing population, nuclear arsenal, and relationships with China and India will continue to force it upon America's geostrategic map in new and important ways over the coming decades. This book explores the main trends in Pakistani society that will help determine its future, traces the wellsprings of Pakistani anti-American sentiment through the history of US-Pakistan relations from 1947 to 2001, assesses how Washington made and implemented policies regarding Pakistan since the terrorist attacks on the United States on September 11, 2001, and analyzes how regional dynamics, especially the rise of China, will likely shape US-Pakistan relations. It concludes with three options for future US strategy described as defensive insulation, military first, cooperation, and comprehensive cooperation.

Better Safe Than Sorry Michael Krepon, 2009-01-02 In 2008, the iconic doomsday clock of the Bulletin of the Atomic Scientists was set at five minutes to midnight, two minutes closer to Armageddon than in 1962 when John F. Kennedy and Nikita Khrushchev went eyeball to eyeball over missiles in Cuba. We still live in an echo chamber of fear after eight years in which the Bush administration and its harshest critics reinforced each other's worst fears about the Bomb. And yet there have been no mushroom clouds or acts of nuclear terrorism since the Soviet Union dissolved, let alone since 9/11. Our worst fears still could be realized at any time, but Michael Krepon argues that the United States has never possessed more tools and capacity to reduce nuclear dangers than it does today, from containment and deterrence to diplomacy, military strength, and arms control. The bloated nuclear arsenals of the Cold War years have been greatly reduced, nuclear weapon testing has almost ended, and all but eight countries have pledged not to acquire the Bomb. Major powers have less use for the Bomb than at any time in the past. Thus, despite wars, crises, and Murphy's Law, the dark shadows cast by nuclear weapons can continue to recede. Krepon believes that positive trends can continue even in the face of the twin threats of nuclear terrorism and proliferation that have

been exacerbated by the Bush administration's pursuit of a war of choice in Iraq based on false assumptions. Krepon advocates a back to basics approach to reducing nuclear dangers reversing the Bush administration's denigration of diplomacy, deterrence, containment and arms control. As he sees it, The United States has stumbled before but America has also made it through hard times and rebounded. With wisdom, persistence and luck, another dark passage can be successfully navigated.

Pakistan's Nuclear Weapons Bhumitra Chakma, 2012-10-12 Pakistan is a vitally important country in the contemporary global political system. It is a de facto nuclear state and a pivotal country in the War on Terror. This book provides a comprehensive study of a nuclear armed Pakistan investigating the implications of its emergence as a nuclear weapons state. Setting out the historical background of Pakistani nuclear development, the book examines the lessons for proliferation that can be drawn from the Pakistan case. It explains the changes and continuities of Pakistan's nuclear policy, assessing its emerging force posture and the implications for Pakistani, South Asian and global security. It also considers the extent to which Pakistan can be said to have a nuclear doctrine, the Pakistani nuclear command and control system and the relationship between Pakistan and the Non Proliferation regime. Addressing the issue of whether Pakistan should be viewed as a proliferator and the implications of a nuclear Pakistan for global terrorism, *Pakistan's Nuclear Weapons* is an important study of all the major issues surrounding Pakistan's emergence as a nuclear power.

Nuclear Weapons and Coercive Diplomacy Todd S. Sechser, Matthew Fuhrmann, 2017-01-16 Are nuclear weapons useful for coercive diplomacy? Since 1945 most strategic thinking about nuclear weapons has focused on deterrence using nuclear threats to prevent attacks against the nation's territory and interests. But an often overlooked question is whether nuclear threats can also coerce adversaries to relinquish possessions or change their behavior. Can nuclear weapons be used to blackmail other countries? The prevailing wisdom is that nuclear weapons are useful for coercion but this book shows that this view is badly misguided. Nuclear weapons are useful mainly for deterrence and self defense not for coercion. The authors evaluate the role of nuclear weapons in several foreign policy contexts and present a trove of new quantitative and historical evidence that nuclear weapons do not help countries achieve better results in coercive diplomacy. The evidence is clear: the benefits of possessing nuclear weapons are almost exclusively defensive not offensive.

Nuclear Strategy in the Modern Era Vipin Narang, 2014-05-25 The world is in a second nuclear age in which regional powers play an increasingly prominent role. These states have small nuclear arsenals, often face multiple active conflicts and sometimes have weak institutions. How do these nuclear states and potential future ones manage their nuclear forces and influence international conflict? Examining the reasoning and deterrence consequences of regional power nuclear strategies, this book demonstrates that these strategies matter greatly to international stability and it provides new insights into conflict dynamics across important areas of the world such as the Middle East, East Asia and South Asia. Vipin Narang identifies the diversity of regional power nuclear strategies and describes in detail the posture each regional power has adopted over time. Developing a theory for the sources of regional power

nuclear strategies he offers the first systematic explanation of why states choose the postures they do and under what conditions they might shift strategies Narang then analyzes the effects of these choices on a state's ability to deter conflict Using both quantitative and qualitative analysis he shows that contrary to a bedrock article of faith in the canon of nuclear deterrence the acquisition of nuclear weapons does not produce a uniform deterrent effect against opponents Rather some postures deter conflict more successfully than others Nuclear Strategy in the Modern Era considers the range of nuclear choices made by regional powers and the critical challenges they pose to modern international security

Restraining Air Power Robert C. Owen, Lazar Berman, Benjamin S. Lambeth, Forrest E. Morgan, Steven Paget, 2022-11-29 Is it possible for two combatants who possess equally strong air forces to conduct limited warfare by restraining air operations In *Restraining Air Power* Robert C. Owen and contributing authors aim to answer this question by providing theoretical and empirical assessments of restrained air warfare through five historical case studies since 1945 Through an objective analysis of the past this collection evaluates the principles of escalation and escalation management in conventional warfare scenarios to better understand when why and how peer opponents in past conflicts have expanded or restrained air operations The surge in cyber warfare the development of artificially intelligent weaponry and the founding of the United States Space Force in 2019 mean that analysts and military planners must be prepared to think about escalation management and peer conflict in increasingly complicated and arduous ways This comprehensive study provides readers with refined theoretical visions of the possibilities and challenges of managing escalation as a powerful mode of warfare between opponents who believe they must choose between sacrificing their own national interests or risking escalated destruction of their economies military forces and governing authority The analysis within the pages of this volume updates our understanding of air warfare within a world of unprecedented military complexity and as such will hold immense value for specialists in advanced military studies as well as those studying international relations and history

The Challenges of Nuclear Non-Proliferation Richard Dean Burns, Philip E. Coyle, 2015-03-12 The Challenges of Nuclear Non Proliferation is an exhaustive survey of the many aspects of non proliferation efforts It explains why some nations pursued nuclear programs while others abandoned them as well as the challenges strengths and weaknesses of non proliferation efforts It addresses key issues such as concerns over rogue states and stateless rogues delivery systems made possible by technology and the connection between nuclear weapons and ballistic missiles examining whether non proliferation regimes can deal with these threats or whether economic or military sanctions need to be developed It also examines the feasibility of eliminating or greatly reducing the number of nuclear weapons A broad survey of one of today's great threats to international security this text provides undergraduates students with the tools needed to evaluate current events and global threats

A Global History of the Nuclear Arms Race Richard Dean Burns, Joseph M. Siracusa, 2013-04-23 Written by two preeminent authors in the field this book provides an accessible global narrative of the nuclear arms race since 1945 that focuses on the roles of key scientists military chiefs and political

leaders The first book of its kind to provide a global perspective of the arms race this two volume work connects episodes worldwide involving nuclear weapons in a comprehensive narrative fashion Beginning with a discussion of the scientific research of the 1930s and 1940s and the Hiroshima decision the authors focus on five basic themes political dimensions technological developments military and diplomatic strategies and impact The history of the international nuclear arms race is examined within the context of four historical eras America s nuclear monopoly America s nuclear superiority superpower parity and the post Cold War era Information about the historical development of the independent deterrence of Britain France and China as well as the piecemeal deterrence of newcomers Israel India Pakistan and North Korea is also included as is coverage of the efforts aimed at the international control of nuclear weapons and the diplomatic architecture that underpins the global nuclear non proliferation regime

Changing Patterns of Warfare between India and Pakistan

Rizwana Abbasi,Muhammad Saeed Uzzaman,2023-05-12 Changing Patterns of Warfare between India and Pakistan analyzes how advanced nuclear technologies and the advent of disruptive technologies have affected the evolving conflict between India and Pakistan Advanced nuclear technologies such as nuclear submarines aircraft carriers ballistic missile defence systems BMDs multiple independently targetable re entry vehicles MIRVs anti satellite weapons ASAT and disruptive technologies such as hypersonic weapons artificial intelligence AI lethal autonomous weapons LAWS unmanned aerial vehicles UAVs drones and space based and cyber technologies have all complicated crisis dynamics and the domain of warfare in the region Further the employment of India s compellence strategy is an indication of a change in its stance that demonstrates smart surgical strikes are now more likely The phenomenon of surgical strikes raises the question of how disruptive technologies will be used to gain direct indirect military control and hence challenge the existing status quo and deterrence stability Against this backdrop the authors predict how this conflict may develop in the future and evaluate the ways to stabilize deterrence and regulate the militarization of artificial intelligence and disruptive technologies between India and Pakistan This book will be of interest to all those researching and working in the fields of security studies strategic studies nuclear policy deterrence thinking and proliferation non proliferation aspects of the nuclear weapons programme within South Asia and beyond It will also be relevant for the academic community policy makers diplomats members of international non governmental organizations INGOs professional research institutes and organizations working on India Pakistan relations

Minimum Deterrence and India's Nuclear Security

Rajesh M. Basrur,2009 In this book the leading authority on India s nuclear program offers an informed and thoughtful assessment of India s nuclear strategy Basrur shows that the country s nuclear culture is generally in accord with the principle of minimum deterrence but sometimes drifts into a more open ended view

Nuclear Weapons and Deterrence Stability in South Asia Devin T. Hagerty,2019-06-22 This book examines the theory and practice of nuclear deterrence between India and Pakistan two highly antagonistic South Asian neighbors who recently moved into their third decade of overt nuclear weaponization It assesses the stability of Indo

Pakistani nuclear deterrence and argues that while deterrence dampens the likelihood of escalation to conventional and possibly nuclear war the chronically embittered relations between New Delhi and Islamabad mean that deterrence failure resulting in major warfare cannot be ruled out Through an empirical examination of the effects of nuclear weapons during five crises between India and Pakistan since 1998 as well as a discussion of the theoretical logic of Indo Pakistani nuclear deterrence the book offers suggestions for enhancing deterrence stability between these two countries

The Politics of Nuclear Weapons in South Asia Bhumitra Chakma, 2016-02-24 An important and critical re evaluation of South Asia's post tests nuclear politics in contrast to other books this volume emphasises the political dimension of South Asia's nuclear weapons explains how the bombs are used as politico strategic assets rather than pure battlefield weapons and how India and Pakistan utilise them for politico strategic purposes in an extremely complex and competitive South Asian strategic landscape Written by a group of perceptive observers of South Asia this volume evaluates the current state of Indo Pakistani nuclear deterrents the challenges that the two countries confront in building their nuclear forces the post test nuclear doctrines of the two strategic rivals the implications of Indo Pakistani politics for regional cooperation the role of two systemic actors USA and China in the region's nuclear politics and the critical issues of confidence building and nuclear arms control

Exploring Regional Responses to a Nuclear Iran C. Hobbs, M. Moran, 2013-10-07 This book challenges the widely held assumption that a nuclear armed Iran would provoke a proliferation cascade in the Middle East Arguing that a domino effect is by no means inevitable the authors set out a number of policy measures that could be enacted by the international community to reduce this risk

India's Nuclear Policy Bharat Karnad, 2008-10-30 This book examines the Indian nuclear policy doctrine strategy and posture clarifying the elastic concept of credible minimum deterrence at the center of the country's approach to nuclear security This concept Karnad demonstrates permits the Indian nuclear forces to be beefed up size and quality wise and to acquire strategic reach and clout even as the qualifier minimum suggests an overarching concern for moderation and economical use of resources and strengthens India's claims to be a responsible nuclear weapon state Based on interviews with Indian political leaders nuclear scientists and military and civilian nuclear policy planners it provides unique insights into the workings of India's nuclear decision making and deterrence system Moreover by juxtaposing the Indian nuclear policy and thinking against the theories of nuclear war and strategic deterrence nuclear escalation and nuclear coercion offers a strong theoretical grounding for the Indian approach to nuclear war and peace nuclear deterrence and escalation nonproliferation and disarmament and to limited war in a nuclearized environment It refutes the alarmist notions about a nuclear flashpoint in South Asia etc which derive from stereotyped analysis of India Pakistan wars and examines India's likely conflict scenarios involving China and minorly Pakistan
