*Shadow Medicine* John S. Haller, Jr., 2014-07-08 Can Evidence Based Medicine EBM and Complementary and Alternative Medicine CAM find common ground A distinguished historian of medicine John S Haller Jr explores the epistemological foundations of EBM and the challenges these conceptual tools present for both conventional and alternative therapies As he explores a possible reconciliation between their conflicting approaches Haller maintains a healthy scientific skepticism yet finds promise in select complementary and alternative CAM therapies Haller elucidates recent research on the placebo effect and shows how a new engagement between EBM and CAM might lead to a more productive medical practice that includes both the objectivity of evidence based medicine and the subjective truth of the physician patient relationship Haller s book tours key topics in the standoff between EBM and CAM how and why the double blinded randomized clinical trial RCT came to be considered the gold standard in modern medicine the challenge of postmodern medicine as it counters the positivism of evidence based medicine and the politics of modern CAM and the rise of the National Center for Complementary and Alternative Medicine He conducts an in depth case study of homeopathy explaining why it has emerged as a poster child for CAM and assesses CAM s popularity despite its poor performance in clinical trials Haller concludes with hope showing how new experimental protocols might tease out the evidentiary basis for the placebo effect and establish a foundation for some reconciliation between EBM and CAM *Orthodox and Alternative Medicine* Mike Saks, 2003-03 There s no book like it It s Saks subject and he s good Roy Porter This fascinating book explores the changing relationship between orthodox and alternative medicine in Britain and the United States from the sixteenth century to the present day Mike Saks sees the development of orthodox and alternative medicine as two sides of the same coin and his analysis centers on the role of professionalization in health care In the sixteenth century the line between orthodox and alternative medicine was blurred By the nineteenth and twentieth centuries the increasing professionalization of orthodox bio medicine had marginalized medical

alternatives In recent years following the growth of a strong counter culture in the 1960s and 1970s perceptions of the relationship between the two forms of practice have begun to change again The de professionalization of orthodox medicine is being debated while ironically alternative medicine has become increasingly professionalized Mike Saks considers the political dynamics of the process of professionalization and looks at the dilemmas posed for both medical orthodoxy and alternative medicine in the development of a more integrated health care system in Britain and the United States in the future

*Medicine, Health and Being Human* Lesa Scholl, 2018-05-11 *Medicine Health and Being Human* begins a conversation to explore how the medical has defined us that is the ways in which perspectives of medicine and health have affected cultural understandings of what it means to be human With chapters that span from the early modern period through to the contemporary world and are drawn from a range of disciplines this volume holds that incremental historical and cultural influences have brought about an understanding of humanity in which the medical is ingrained consciously or unconsciously usually as a mode of legitimisation Divided into three parts the book follows a narrative path from the integrity of the human soul through to the integrity of the material human body then finally brought together through engaging with end of life responses Part 1 examines the move from spirituality to psychiatry in terms of the way medical science has influenced cultural understandings of the mind Part 2 interrogates the role that medicine has played in the nineteenth and twentieth centuries in constructing and deconstructing the self and other including the fusion of visual objectivity and the scientific gaze in constructing perceptions of humanity Part 3 looks at the limits of medicine when the integrity of one body breaks down It contends with the ultimate question of the extent to which humanity is confined within the integrity of the human body and how medicine and the humanities work together toward responding to the finality of death This is a valuable contribution for all those interested in the medical humanities history of medicine history of ideas and the social approaches to health and illness
