Crafting Poetry Anthologies in Renaissance England Michelle O'Callaghan, 2020-12-10 The printed poetry anthologies first produced in sixteenth century England have long been understood as instrumental in shaping the history of English poetry This book offers a fresh approach to this history by turning attention to the recreative properties of these books both in the sense of making again of crafting and recrafting and of poetry as a pleasurable pastime The model of materiality employed extends from books as artefacts to their embodiedness their crafted performative and expressive capacities Publishers invariably advertised the recreational uses of anthologies locating these books in early modern performance cultures in which poetry was read silently and in company sometimes set to music and re-crafted into other forms Engaging with studies of material cultures including work on craft households and soundscapes *Crafting Poetry Anthologies* argues for a domestic Renaissance in which anthologies travelled across social classes shaping recreational cultures that incorporated men and women in literary culture **The Works of William Shakespeare: Antony and Cleopatra. Cynbeline. Pericles. Poems** William Shakespeare, 1866 **Englands Helicon**, 1925 *Making the Miscellany* Megan Heffernan, 2021-03-05 In *Making the Miscellany* Megan Heffernan examines the poetic design of early modern printed books and explores how volumes of compiled poems which have always existed in practice responded to media change in sixteenth and seventeenth century England Heffernan's focus is not only the material organization of printed poetry but also how those conventions and innovations of arrangement contributed to vernacular poetic craft the consolidation of ideals of individual authorship and centuries of literary history The arrangement of printed compilations contains a largely unstudied and undertheorized archive of poetic form Heffernan argues In an evolving system of textual transmission compilers were experimenting with how to contain individual poems within larger volumes By paying attention to how they navigated and shaped the exchanges between poems and their organization she reveals how we can witness the

basic power of imaginative writing over the material text Making the Miscellany is also a study of how this history of textual design has been differently told by the distinct disciplines of bibliography or book history and literary studies each of which has handled and obscured the formal qualities of early modern poetry compilations and the practices that produced them Revisiting these editorial and critical approaches this book recovers a moment when compilers poets and readers were alert to a poetics of organization that exceeded the limits of the individual poem
