English And French Towns In Feudal Society A Comparative Study:

English and French Towns in Feudal Society Rodney Howard Hilton,1995-05-04 This is a comparative study of the role of English and French towns in feudal society in the middle ages In bringing together much material which dissolves old categories and simplifications in the study of medieval towns Professor Hilton provides an important new perspective on medieval society and on the nature of feudalism He argues that medieval towns were not as is often thought the harbingers of capitalism and emphasises the way in which urban social structures fitted into rather than challenged feudalism

English and French Towns in Feudal Society R. H. Hilton,1995 *Cambridge and Its Economic Region, 1450-1560* John S. Urban Culture in Medieval Wales Helen Fulton, 2012-05-15 This collection of twelve essays describes aspects of town life in medieval Wales from the way people lived and worked to how they spent their leisure time Drawing on evidence from historical records archaeology and literature twelve leading scholars outline the diversity of town life and urban identity in medieval Wales While urban histories of Wales have charted the economic growth of towns in post Norman Wales much less has been written about the nature of urban culture in Wales This book fills in some of the gaps about how people lived in towns and the kinds of cultural experience which helped to construct a Welsh urban identity

Urban Space in the Middle Ages and the Early Modern Age Albrecht Classen, 2009-12-15 Although the city as a central entity did not simply disappear with the Fall of the Roman Empire the development of urban space at least since the twelfth century played a major role in the history of medieval and early modern mentality within a social economic and religious framework Whereas some poets projected urban space as a new utopia others simply reflected the new significance of the urban environment as a stage where their characters operate very successfully As today the premodern city was the locus where different social

groups and classes got together sometimes peacefully sometimes in hostile terms The historical development of the relationship between Christians and Jews for instance was deeply determined by the living conditions within a city By the late Middle Ages nobility and bourgeoisie began to intermingle within the urban space which set the stage for dramatic and far reaching changes in the social and economic make up of society Legal historical aspects also find as much consideration as practical questions concerning water supply and sewer systems Moreover the early modern city within the Ottoman and Middle Eastern world likewise finds consideration Finally as some contributors observe the urban space provided considerable opportunities for women to carve out a niche for themselves in economic terms

Print Culture and Peripheries in Early Modern Europe Benito Rial Costas, 2012-11-09 Despite the fact that if only by number small and peripheral cities played an important role in fifteenth and sixteenth century European print culture book history has mainly been dominated by monographs on individual big book centres Through a number of specific case studies which deploy a variety of methods and a wide range of sources this volume seeks to enhance our understanding of printing and the book trade in small and peripheral European cities in the fifteenth and sixteenth centuries and to emphasize the necessity of new research for the study of print culture in such cities

Social Identity in Early Medieval Britain William O. Frazer, Andrew Tyrell, 2001-01-01 Social identity is a concept of increasing importance in the social sciences Here the concept is applied to the often atheoretical realm of medieval studies Each contributor focuses on a particular topic of early medieval identity ethnicity national identity social location subjectivity personhood political organization kinship the body gender age proximity regionality memory and ideological systems The result is a pioneering vision of medieval social identity and a challenge to some of the received general wisdoms about this period
