each of its standard periods can be illuminated by comparative consideration of the different literary languages within Europe and by the ties of European literature to world literature World literature is marked by recurrent systematic features outcomes of the way that language and literature are at once the products of major change and its agents Cohen tracks these features from ancient times to the present distinguishing five main overlapping stages Within that framework he shows that European literatures ongoing internal and external relationships are most visible at the level of form rather than of thematic statement or mimetic representation European literature emerges from world literature before the birth of Europe during antiquity whose Classical languages are the heirs to the complex heritage of Afro Eurasia This legacy is later transmitted by Latin to the various vernaculars The uniqueness of the process lies in the gradual displacement of the learned language by the vernacular long dominated by Romance literatures That development subsequently informs the second crucial differentiating dimension of European literature the multicontinental expansion of its languages and characteristic genres especially the novel beginning in the Renaissance This expansion ultimately results in the reintegration of European literature into world literature and thus in the creation of todays global literary system The distinctiveness of European literature is to be found in these interrelated trajectories *Common Reading* Stefan Collini,2008 In this series of penetrating and attractively readable essays Stefan Collini explores aspects of the literary and intellectual culture of Britain from the early twentieth century to the present Collini focuses on critics and historians who wrote for a non specialist readership and on the periodicals and other genres through which they attempted to reach that readership Among the critics discussed are Cyril Connolly V S Pritchett Aldous Huxley Rebecca West Edmund Wilson and George Orwell while the historians include A L Rowse Arthur Bryant E H Carr and E P Thompson There are also essays on wider themes such as the fate of general periodicals the history of reading the role of criticism changing conceptions of culture the limitations of biography and the functions of universities Explicitly addressed to the non specialist reader these essays make some of the fruits of detailed scholarly research in various fields available to a wider audience in a succinct and elegant manner Stefan Collini has been acclaimed as one of the most brilliant essayists of our time and this collection shows him at his subtle perceptive and trenchant best The book will appeal to and delight readers interested in literature history and contemporary cultural debate **Cumulative Index to Nursing Literature** Cinahl Information Systems Staff,1999 **The Effect of**
