Fein, Michael Robert Johnston, 2014 Essays examining the compiler and contents of two of the most important and significant extant late medieval manuscript collections **Women and Early Modern Cultures of Translation** Hilary

Brown, 2022-05-26 *Women and Early Modern Cultures of Translation Beyond the Female Tradition* is a major new intervention in research on early modern translation and will be an essential point of reference for anyone interested in the history of women translators Research on women translators has often focused on early modern England the example of early modern England has been taken as the norm for the rest of the continent and has shaped research on gender and translation more generally This book brings a new European perspective to the field by introducing the case of Germany It draws attention to forty women who can be identified as translators in sixteenth and seventeenth century Germany and shows how their work does not fit easily into traditional narratives about marginalization and subversiveness The study uses the example of Germany to argue against reading the work of translating women primarily through the lens of gender and to challenge claims about the existence of a female translation tradition which transcends the boundaries of time and place Broadening our perspective to include Germany provides a more nuanced and informed account of the position of women within European translation cultures and forces us to rethink gender as a category of analysis in translation history The book makes the case for a new woman interrogated approach to translation history to borrow a concept from Carol Maier and as such it will provide a blueprint for future work in the area **Perceptions of Medieval Manuscripts** Elaine

Treharne, 2021-10-21 *Perceptions of Medieval Manuscripts* takes as its starting point an understanding that a medieval book is a whole object at every point of its long history As such medieval books can be studied most profitably in a holistic manner as objects in the world This means readers might profitably account for all aspects of the manuscript in their observations from the main texts that dominate the codex to the marginal notes glosses names and interventions made through time This holistic approach allows us to tell the story of the book's life from the moment of its production to its use collection breaking up and digitization all aspects of what can be termed dynamic architextuality The ten chapters include detailed readings of texts that explain the processes of manuscript manufacture and writing taking in invisible components of the book that show the joy and delight clearly felt by producers and consumers Chapters investigate the filling of manuscripts blank spaces

presenting some texts never examined before and assessing how books were conceived and understood to function Manuscripts heft and solidness can be seen too in the depictions of miniature books in medieval illustrations Early manuscripts thus become archives and witnesses to individual and collective memories best read as relics of existence as Maurice Merleau Ponty describes things As such it is urgent that practices fragmenting the manuscript through book breaking or digital display are understood in the context of the book s wholeness Readers of this study will find chapters on multiple aspects of medieval bookness in the distant past the present and in the assurance of the future continuity of this most fascinating of cultural artefacts
