English On The Internet 2001 Evaluating Online Resources:

New Perspectives on CALL for Second Language Classrooms Sandra Fotos, Charles M. Browne, 2013-06-17 This practical handbook is designed to help language teachers, teacher trainers and students learn more about their options for using computer assisted language learning CALL and develop an understanding of the theory and research supporting these options. The chapters in *New Perspectives on CALL for Second Language Classrooms* synthesize previous CALL theory and research and describe practical applications to both second and foreign language classrooms including procedures for evaluating these applications. The implementation of CALL at the institutional level is also addressed with attention to designing multimedia language laboratories and creating collaborative CALL based projects between educational institutions. Although many chapters locate their descriptions of CALL activities and projects within the ESL/EFL setting, the principles and activities described are equally useful for other language settings. The book does not require prior knowledge of CALL, computers or software. To assist readers, a glossary of CALL terms and an appendix of CALL Web sites are provided. The book also has its own accompanying Web site <http://www.era.com/callforL2classrooms> presenting chapter abstracts, author contact information and regularly updated links to pedagogical research and teacher development sites. By integrating theoretical issues, research findings and practical guidelines on different aspects of CALL, this book offers teachers multiple levels of resources for their own professional development, for needs based creation of specific CALL activities for curriculum design and for implementation of institutional and inter institutional CALL projects.

Cyber Worship in Multifaith Perspectives Mohamed Taher, 2006 *Cyber Worship in Multifaith Perspectives* as is implied by its name explores worship in Prayer, Praise, Scripture, Sacrament, Rituals, Confessions, Eucharist, Rites, Pilgrimages, Reflection, Contemplation etc. on the Internet. It is not an everything you need to know guide about the subjects of faith and belief, religions online, religions on the Net or religions in cyberspace. Rather it is a book about religious and spiritual experience under the rubric cyber worship which is the variety of ways religious devotion is performed and carried out on the Internet. The term Cyber Worship is a catchall phrase which includes variants such as online worship, virtual worship, electronic prayer, cyber puja, cyber synagogue and so on. Dr. Mohamed Taher has thus assembled a quick reference for two groups: those communities that are involved in Cyber Worship and business Webs that collaborate in sustaining wired environments. As such, this book provides an interesting and current perspective on a practice that will continue to grow in the future.
