The extensive scope of this collection means that this documentary record of the reception of German literature in England is a valuable scholarly resource. One of the most important features of British

literary and intellectual history over the past 250 years is the influence of German literature. From the second half of the 18th Century through the first decades of the 19th, German books and ideas attracted then gained the attention of a nation. Despite the acknowledged importance of the influence on writers such as Coleridge and Carlyle, the subject though often alluded to was rarely studied. This collection provides a guidebook through the masses of periodical and allows the English side of the Anglo-German literary relationship to be explored in detail. In order to make the collection useful to scholars with a wide range of interest, it has been divided into three parts. Part 1 is a chronological presentation of commentary on German literature in general. It also contains collective reviews of multiple German authors, notices of important anthologies and reactions to influential works about Germany and its culture. Part 2 collects reviews of 18th Century individual German authors and Part 3 is devoted to the English reception of Goethe and Schiller. Parts 2 & 3 contain cross references to the collective reviews of Part 1. Containing over 200 British serials and articles and reviews from all the major English literary periodicals, the collection also includes a broad sampling of opinion from the more general magazines including some popular religious publications.

**A Theology of Artistic Sensibilities** John Dillenberger, 2004-10-19. For most of history, argues John Dillenberger, the visual arts were for better or worse part of the very fabric of the life and thought of the church. But with the Reformation and the Counter Reformation, a major change took place.

Protestant rejection of the visual was matched in Roman Catholicism by the reduction of its formative power. While the visual arts dropped out of the lives of Protestant churches they became a memory rather than a source of ennoblement or power in the Roman Catholic Church. Thus in different but allied ways Protestants and Catholics lost the power of the visual. Part art history part historical theology and part theological reflection this book is both an argument and a program for the recovery of the visual arts in the life of the church for reclaiming seeing as part of religious perception. It offers a theological understanding of the visual and provides a basis upon which the visual arts may again be incorporated into Protestantism and reinvigorated in Roman Catholicism. The first part is devoted to historical reconstruction exploring those moments in Western history in which the relation between religion and the arts was in ferment. Part 2 is given to contemporary delineation and analysis of spiritual perceptions in modern American painting and sculpture of modern church art and architecture and of the changing views of contemporary theologians toward the visual arts. Citing David Tracy Karl Rahner Langdon Gilkey and others as examples Dillenberger argues that contemporary theology is moving away from the modern rationalistic understanding of theological analogy to one far closer to the arts. Part 3 is constructive developing a theological perspective that demands and includes the visual arts and suggesting ways in which this can be accomplished in pastoral and theological education. The world of art says Professor Dillenberger is more aware of the role of religion in the arts than the world of religion is of art. Thus it is time for the church to resume its historic association with the visual arts albeit in analogous rather than repristinating ways.
