The L2 Acquisition of Spanish Subjects Margaret Quesada,2015-07-01 There is a long overdue need to address the sharp philosophical and methodological divide between formal generative and functional discourse perspectives in contemporary theoretical linguistics and L2 acquisition Language structure in general and the use of subjects in particular is dependent upon multiple syntactic lexico semantic and discourse pragmatic factors Therefore the study of L2 acquisition must be equally multi faceted This volume examines data from over twenty years of research in the L2 acquisition of Spanish subjects from several theoretical perspectives including generative

approaches processing theory discourse pragmatics and sociolinguistic variationist models By so doing the author seeks to fulfill two principal objectives the first is to determine the many linguistic and extra linguistic properties of Spanish subjects that constrain their acquisition and use and the second is to establish common ground among researchers from varied theoretical persuasions in acquisition studies The author argues throughout the volume that central to native speaker use and L2 acquisition are universal properties ranging from highly specific syntactic principles to more general characteristics of human cognition and a range of these properties is responsible for language acquisition An examination of the diverse body of research that considers a wider scope of universal properties of language can thus bring us closer to a unified account of the L2 acquisition of Spanish subject expression El-Hi Textbooks & Serials in Print, 2005 ,2005 Of Mind and Machine Chunshen Zhu,Chengzhi Jiang,2024-06-28 Of Mind and Machine provides a broad perspective on multi level dialogic engagements between text and reader as seen from the use of language in presenting information to generate a discursive experience in various sociocultural settings The book observes contexts such as national literature in translation diplomatic speech events visual verbal inter semiotic translation second language learning interpreter training and computer aided teaching of translation and bilingual writing These present a unifying interest in textual accountability between form function and effect that has been examined from a dual perspective of rhetoric and pragmatics The research embodies a significant prospect of integration of academic originality with technological innovation to advance language education in the present digital era Theoretically well founded the book does not confine itself to a self contained system of conceptions and methods Instead it demonstrates a rich variety of research possibilities in support of theorisation and education in the field of language and translation studies This edited volume is primarily intended for advanced undergraduates postgraduates researchers and teachers within the fields of language and translation applied linguistics and discourse analysis
