Brooke, 2015-07-13 Excerpt from English Literature From the Beginning to the Norman Conquest This book is necessarily as far as the chapter on King AElfred a recast of my previous book on Early English Literature up to the Days of Alfred That book in two volumes was too expensive and too long for students in schools I chose to write it at that length and I am glad I did so I was enabled to introduce a great deal of correlative matters which I thought were needed to bring the literature into touch with the history of the country and in order to give life colour and reality to a time so far away and in which so little interest is taken by the English public But having tried to do this I have now left out these correlative matters shortened the whole of the history up to AElfred rewritten it and rearranged it Of course some of the older book remains mixed up with the new those parts of it especially which give an account of the poems The translations though carefully revised are the same but many of them have been omitted I have written about King AElfred at a length somewhat out of proportion with the rest of the book but the freshly awakened interest of the public in his life and character induced me to give a full account of all that was personal in his literary work About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works      **ENGLISH LITERATURE FROM THE BE** Stopford Augustus 1832-1916 Brooke, 2016-08-25 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work was reproduced from the original artifact and remains as true to the original work as possible Therefore you will see the original copyright references library stamps as most of these works have been housed in our most important libraries around the world and other notations

writing began to insist for the first time that it floated free of any social reality or function This book also charts the complex mechanisms by which English writing acquired this power in a series of linked close readings of both canonical and more obscure texts It encloses those readings in five compelling accounts of much broader cultural areas describing in particular the productive relationship of Middle English writing to medieval technology insurgency statecraft and cultural place concluding with an in depth account of the particular arguments emphases and techniques English writers used to claim a wholly new jurisdiction for their work Both this history and its readings are everywhere informed by the most exciting developments in recent Middle English scholarship as well as literary and cultural theory It serves as an introduction to all these areas as well as a contribution in its own right to each of them      *A History of English Literature* William Vaughn Moody, Robert Morss Lovett, 1926      **English Literature, from the Beginning to the Norman Conquest, by Stopford A.
