**Enhancing Parental Involvement in an Urban High School Through the Collaborative Development of a Parent-family Center** LaSandra Watkins,2010 Education is arguably the oldest known profession in the history of mankind It predates any other form of interactive processes that humans have participated in with each other From the beginning of time man has been either the recipient or the deliverer of knowledge It was not until sometimes later after man s arrival on earth did formal education actually begin Man was taught while living in the Garden of Eden what was right and what was wrong He was given an infinite prescription to knowledge by his Creator his Father This was the first example of parental involvement As time has passed the educational profession has evolved and changed from a rigid male dominated activity to a mosaic of many different integral players which we call stakeholders Not only have the players stakeholders changed but also the strategies and techniques that educators use to disseminate the information from teachers to students have changed Many students lack the necessary motivation and tenacity to meet the educational challenges directly and perform to their highest level intellectually Instead today students require need

something extra to help them excel academically and behaviorally This action research project Bogdan Creswell 2003 investigates the impact that opening a parent family center in an urban high school will have on increasing the level of parental involvement in their children s educational activities of Davenport High School This action research project also sought to determine if the presence of a parent family center would change the perception that students and parents have toward education Research Abrams 2002 Comer 1998 1992 93 Epstein 1986 1994 1995 Fehrmann et al 1987 Finn 1998 Jesse 1998 Lofthouse 1999 supports the assertion that today s students need their parents guardians caregivers actively involved in their lives academically The National Parent Teacher Association supports parents as partners and as their students first teachers From this study I have come to the conclusion that parental involvement is vital to the success of students academically and behaviorally When utilized correctly parents can assist urban schools in their efforts to become competitive in preparing students to enter the workforce
